HIS Excellency the Governor has been pleased to direct the publication, for general information, of the following Despatch and its Enclosure received from the Right Honourable the Secretary of State for the Colonies.

HORACE TOZER.

THE SECRETARY OF STATE FOR THE COLONIES to THE GOVERNOR OF QUEENSLAND.

Circular.]

Downing street, 29th January, 1897.

SIR,—I have the honour to transmit to you, for the information of your Government, copies of Regulations which have been issued by the Local Government Board for dealing with Cholera, Yellow Fever, and Plague, at Ports in the United Kingdom.

The Local Government Board have drawn my attention to the fact that these Regulations show that a wide divergence exists between the practice as regards Quarantine followed in certain Colonies, and the principles which the Board regard as suitable for effective dealing with the diseases referred to, with a view to preventing their spread, both on land and water.

I have, &c.,

J. CHAMBERLAIN.

[Enclosure.]

REGULATIONS AS TO CHOLERA, YELLOW FEVER, AND PLAGUE: PORTS.

General.]

To all Port Sanitary Authorities;
To all other Sanitary Authorities as herein defined;
To the Queen's Harbour Masters of Dockyard Ports;
To all Officers of Customs;
To all Medical Officers of Health of the Sanitary Authorities aforesaid;
To all Masters of Ships;
To all Pilots;
And to all others whom it may concern.

WHEREAS we, the Local Government Board, are empowered by Section 130 of the Public Health Act, 1875, as amended by the Public Health Act, 1896, from time to time to make, alter, and revoke such Regulations as to us may seem fit, with a view to the treatment of persons affected with Cholera or any other epidemic, endemic, or infectious disease, and preventing the spread of Cholera and such other diseases, as well on the seas, rivers, and waters of the United Kingdom, and on the high seas within three miles of the coasts thereof, as on land; and may provide for the enforcement and execution of such Regulations.

And whereas by Section 1 of the Public Health Act, 1896, it is enacted that Regulations of the Local Government Board made in pursuance of Section 130 of the Public Health Act, 1875, or in pursuance of that Section, as extended to London by the Public Health (London) Act, 1891, may provide for such Regulations being enforced and executed by the Officers of Customs and the officers and men employed in the Coast-guard as well as by other authorities and officers, and without prejudice to the generality of the powers conferred by those Sections may provide for—

- (a) The signals to be hoisted by vessels having any case of epidemic, endemic, or infectious disease on board; and
- (b) The questions to be answered by masters, pilots, and other persons on board any vessel as to cases of such disease on board during the voyage or on the arrival of the vessel; and

- (c) The detention of vessels and of persons on board vessels; and
- (d) The duties to be performed in cases of such disease by masters, pilots, and other persons on board vessels: Provided that the Regulations shall be subject to the consent—
 - (a) So far as they apply to the officers of Customs, of the Commissioners of Her Majesty's Customs; and
 - (b) So far as they apply to officers or men employed in the Coastguard, of the Admiralty; and
 - (c) So far as they apply to signals, of the Board of Trade.

And whereas by certain Orders dated respectively the twenty-eighth day of August, 1890, and the sixth day of September, 1892, we made Regulations with a view to the treatment of persons affected with Cholera, and for preventing the spread of the disease, and it is expedient that such Orders should be revoked, and that Regulations should be made as hereinafter mentioned, to which the Commissioners of Her Majesty's Customs and the Board of Trade have respectively signified their consent so far as such Regulations respectively apply to the Officers of Customs and to signals:

Now therefore, we, the Local Government Board, do hereby revoke the aforesaid Orders, except in so far as they may apply to any proceedings now pending, and we do, by this our Order, and in exercise of the powers conferred on us by the Public Health Act, 1875, the Public Health (London) Act, 1891, and the Public Health Act, 1896, and every other power enabling us in that behalf, make the following Regulations, and declare that they shall be enforced and executed by the Authorities and Officers hereinafter mentioned:—

The Officer of Customs who, on the arrival of any ship from foreign, shall visit such ship shall, if he find, or have reason to suspect, that the ship is infected, detain such ship, and order the Master forthwith to moor or anchor the same in such position as such Officer of Customs shall direct; and thereupon the Master shall forthwith moor or anchor the ship accordingly.

Art. 3.—Whilst such ship shall be so detained, no person (other than an Officer of Customs or a person acting in the execution of this Order) shall leave the same.

Art. 4.—The Officer of Customs detaining any ship as aforesaid shall forthwith give notice thereof, and of the cause of such detention, to the Sanitary Authority of the place where such ship is lying.

Art. 5.—Such detention by the Officer of Customs shall cease as soon as the ship shall have been duly visited and examined by the Medical Officer of Health; or, if the ship shall, upon such examination, be found to be infected, as soon as the same shall be moored or anchored in pursuance of Article 10.

Provided, that if the examination be not commenced within twelve hours after the ship shall have been moored or anchored in pursuance of subdivision 2 of Article 2, the ship shall, on the expiration of the said twelve hours, be released from detention.

PART III.

Art. 6.—Every Port Sanitary Authority and every other Sanitary Authority within whose district persons are likely to be landed from ships coming foreign shall, with the approval of the Chief Officer of Customs of the port, fix some place where any ship may be moored or anchored for the purpose of Article 10; and shall make provision for the reception of patients and persons suffering from Cholera, Yellow Fever, and Plague, and removed under Articles 13 and 14. Provided that, in the case of any Dockyard Port for which a Queen's Harbour Master has been appointed, the place where any ship shall be moored or anchored for the purpose of Article 10 shall from time to time be fixed by the Port Sanitary Authority with the Approval of the Queen's Harbour Master, instead of with that of the Chief Officer of Customs of the Port.

Provided also, that where, in pursuance of the above-cited Order of the Twenty-eighth day of August, one thousand eight hundred and ninety, or of any Order by the said Order revoked, places have been fixed for the mooring or anchoring of ships for the purposes of the regulations by this Order revoked, such places shall be deemed to have been so fixed in pursuance of and for the purposes of this Order.

Art. 7.—The Sanitary Authority, on notice being given to them by an Officer of Customs, under Article 4, shall forthwith cause the ship in regard to which such notice shall have been given, to be visited and examined by their Medical Officer of Health for the purpose of ascertaining whether such ship is infected.

Art. 8.—The Medical Officer of Health, if he have reason to suspect that any ship coming or being within the jurisdiction or district of the Sanitary Authority, whether examined by the Officer of Customs or not, is infected, shall, or, if he have reason to suspect that the ship has come from an infected place, may, visit and examine such ship for the purpose of ascertaining whether such ship is infected; and may make the like visit and examination in the case of any ship coming or being within the jurisdiction of the Sanitary Authority which has come from an infected place. He shall also give to us information as to the arrival of the ship, and such other particulars as we may require.

Art. 12.—The Medical Officer of Health shall, as soon as possible after any such ship has been certified to be infected, examine every person on board the same, and in the case of any person suffering from Cholera, Yellow Fever, or Plague, or from any illness which the Medical Officer suspects may prove to be Cholera, Yellow Fever, or Plague, shall certify accordingly.

Art. 13.—Every person certified by the Medical Officer of Health to be suffering from Cholera, Yellow Fever, or Plague shall be removed, if his condition admit of it, to some hospital or other suitable place appointed for that purpose by the Sanitary Authority; and no person so removed shall leave such hospital or place until the Medical Officer of Health shall have certified that such person is free from the said disease.

If the contractor sublets any portion of the contract, all workmen and employees engaged thereon shall be paid by the sub-contractor at the times and under the conditions herein specified, but in the event of the sub-contractor failing to make any such payments then the contractor shall be liable to make the same.

15. Before the payment of any money to the contractor the Postmaster-General may require from him satisfactory evidence that all the workmen and employees then and theretofore engaged on this contract have been paid their wages and other lawful claims of every kind in full, in lawful money, and to the latest date at which such wages and claims are due; and the Postmaster-General may withhold the payment of all moneys due or that may become due to the contractor, until he is satisfied that such wages and claims have been paid.

16. If the contractor fails or omits to pay to any workmen or employees engaged upon the contract their full wages in cash once at least in every month, the Postmaster-General may, as often as the same shall happen, upon complaint of such failure or omission made, and upon evidence satisfactory to him of an order or judgment of a Court of Petty Sessions, or of any other court of competent jurisdiction, pay the amount mentioned in such order to such workmen or employees, and deduct the amounts so paid from any sum or sums which may be due or become due to the contractor.

17. Although the Under Secretary and Superintendent of Telegraphs or his officers may furnish any information in connection with this contract, any such information shall not relieve the contractor from any risk or from the fulfilment of his contract, nor will the fact of any such information being given entitle the contractor to make any claim for compensation.

18. The inspecting officer shall have the power to order the dismissal or removal of any foreman or workman employed by the contractor upon giving written notice to the contractor of his intention to do so; and if any such foreman or workman is retained by the contractor after such notice has been given, then the inspecting officer shall have the power to delay the signing of any voucher or certificate for payment for any work done until such order has been obeyed.

19. The decision of the Government Electrical Engineer will be final in all matters of dispute between the contractor and the Government in regard to this contract.

20. The Government does not bind itself to accept the lowest or any Tender.

Specification.

1. Poles and struts to be of the best description of narrow-leaved ironbark, or other approved timber (the approval of any timber will rest with the Government).

2. Each pole and strut to be straight, and to have the bark removed.

3. Each pole and strut to be free from pipes, cracks, splits, knots, grub-holes, gum-veins, and all other defects of any kind whatsoever.

4. Poles to be not less than seven (7) inches in the least diameter, clear of sapwood, at the small end, and not less than thirty-three (33) inches in circumference at five (5) feet from the butt, and not less than twenty-seven (27) feet in length. For each additional five (5) feet, or fraction of five (5) feet, in length, the measurement at five (5) feet from the butt shall be increased by three (3) inches in circumference.

5. Struts are not to be less than twenty-one (21) feet three (3) inches in length, to be sawn off square at the butt, to be not less than six (6) inches, clear of sapwood, in the least diameter at the small end, and not less than twenty-four (24) inches in circumference at the butt.

6. Poles and struts to be well and carefully charred on the butt, and from thence upwards for six (6) feet.

7. There will be about 440 poles and 396 struts required, but the Government reserve the right to either increase or diminish the number of poles and struts required, or to alter the lengths of the poles as may be found necessary; any such alterations to be paid for at schedule rates; and the contractor will have no claim against the Government for either increase or diminution in the numbers, or for any misstatement of quantities.

The greater number of the poles will be required between Colton and Bundaberg. A few may be required between Bundaberg and Rosedale, but the Government does not bind itself in this respect.

[Circular.]

Downing street, 20th January, 1897.

SIR,—At the request of the Board of Trade, I have the honour to transmit to you, for the information of your Government, copies of an Order in Council, dated 27th November, 1896, by which important alterations are made in the International Regulations for preventing Collisions at Sea, together with Copies of a Circular promulgating the new Regulations. These Regulations have been accepted by the principal Maritime Powers, and will come into operation on the 1st July, 1897; and the Board of Trade, considering it of great importance that the Masters and Officers of all British vessels should be made acquainted with the new Rules before that date, have caused notices to be distributed at all ports in the United Kingdom, and at some of the principal Consular ports abroad, and, in order that the distribution may be as complete as possible, have requested that copies of their Circular may be furnished to the Masters of all British vessels in Colonial ports which are not expected to be in the United Kingdom before the 1st July, 1897. Vessels which reach the United Kingdom before that date will be furnished with copies of the Regulations by the various Mercantile Marine Offices.

I shall be glad, therefore, if you will take such steps as are in your power to ensure compliance with the request of the Board of Trade.

C. L. PEEL.

SCHEDULE I.

PRELIMINARY.

These Rules shall be followed by all vessels upon the high seas and in all waters connected therewith, navigable by sea-going vessels.

In the following Rules every steam vessel which is under sail and not under steam is to be considered a sailing vessel, and every vessel under steam, whether under sail or not, is to be considered a steam vessel.

The words "steam vessel" shall include any vessel propelled by machinery,

A vessel is "under way" within the meaning of these Rules when she is not at anchor, or made fast to the shore or aground.

RULES CONCERNING LIGHTS, &c.

The word "visible" in these Rules, when applied to lights, shall mean visible on a dark night with a clear atmosphere.

Article 1.—The Rules concerning lights shall be complied with in all weathers from sunset to sunrise, and during such time no other lights which may be mistaken for the prescribed lights shall be exhibited.

Art. 2.—A steam vessel when under way shall carry—

- (a.) *On or in front of the foremast, or if a vessel without a foremast, then in the fore part of the vessel, at a height above the hull of not less than 20 feet, and if the breadth of the vessel exceeds 20 feet, then at a height above the hull not less than such breadth, so, however, that the light need not be carried at a greater height above the hull than 40 feet, a bright white light, so constructed as to show an unbroken light over an arc of the horizon of 20 points of the compass, so fixed as to throw the light 10 points on each side of the vessel, viz., from right ahead to 2 points abaft the beam on either side, and of such a character as to be visible at a distance of at least 5 miles.*
- (b.) *On the starboard side a green light so constructed as to show an unbroken light over an arc of the horizon of 10 points of the compass, so fixed as to throw the light from right ahead to 2 points abaft the beam on the starboard side, and of such a character as to be visible at a distance of at least 2 miles.*
- (c.) *On the port side a red light so constructed as to show an unbroken light over an arc of the horizon of 10 points of the compass, so fixed as to throw the light from right ahead to 2 points abaft the beam on the port side, and of such a character as to be visible at a distance of at least 2 miles.*

- (d.) *The said green and red side lights shall be fitted with inboard screens projecting at least 3 feet forward from the light, so as to prevent these lights from being seen across the bow.*
- (e.) *A steam vessel when under way may carry an additional white light similar in construction to the light mentioned in subdivision (a). These two lights shall be so placed in line with the keel that one shall be at least 15 feet higher than the other, and in such a position with reference to each other that the lower light shall be forward of the upper one. The vertical distance between these lights shall be less than the horizontal distance.*

Art. 3.—A steam vessel when towing another vessel shall, in addition to her side lights, carry two bright white lights in a vertical line one over the other, not less than six feet apart, and when towing more than one vessel shall carry an additional bright white light 6 feet above or below such lights, if the length of the tow, measuring from the stern of the towing vessel to the stern of the last vessel towed, exceeds 600 feet. Each of these lights shall be of the same construction and character, and shall be carried in the same position as the white light mentioned in Article 2 (a), except the additional light, which may be carried at a height of not less than 14 feet above the hull.

Such steam vessel may carry a small white light abaft the funnel or aftermast for the vessel towed to steer by, but such light shall not be visible forward of the beam.

Art. 4.—(a) A vessel which from any accident is not under command shall carry at the same height as the white light mentioned in Article 2 (a), where they can best be seen, and, if a steam vessel, in lieu of that light, two red lights, in a vertical line one over the other, not less than six feet apart, and of such a character as to be visible all round the horizon at a distance of at least 2 miles; and shall by day carry in a vertical line one over the other, not less than six feet apart, where they can best be seen, two black balls or shapes, each 2 feet in diameter.

(b.) A vessel employed in laying or in picking up a telegraph cable shall carry in the same position as the white light mentioned in Article 2 (a), and, if a steam vessel, in lieu of that light, three lights in a vertical line one over the other, not less than 6 feet apart. The highest and lowest of these lights shall be red, and the middle light shall be white, and they shall be of such a character as to be visible all round the horizon at a distance of at least 2 miles. By day she shall carry in a vertical line one over the other, not less than 6 feet apart, where they can best be seen, three shapes not less than 2 feet in diameter, of which the highest and lowest shall be globular in shape and red in colour, and the middle one diamond in shape and white.

(c.) The vessels referred to in this Article, when not making way through the water, shall not carry the side lights, but when making way shall carry them.

(d.) The lights and shapes required to be shown by this Article are to be taken by other vessels as signals that the vessel showing them is not under command and cannot therefore get out of the way.

These signals are not signals of vessels in distress and requiring assistance. Such signals are contained in Article 31,

Art. 5.—A sailing vessel under way, and any vessel being towed, shall carry the same lights as are prescribed by Article 2 for a steam vessel under way, with the exception of the white lights mentioned therein, which they shall never carry.

Art. 6.—Whenever, as in the case of small vessels under way during bad weather, the green and red side-lights cannot be fixed, these lights shall be kept at hand lighted and ready for use; and shall, on the approach of or to other vessels, be exhibited on their respective sides in sufficient time to prevent collision, in such manner as to make them most visible, and so that the green light shall not be seen on the port side nor the red light on the starboard side, nor, if practicable, more than 2 points abaft the beam on their respective sides.

To make the use of these portable lights more certain and easy, the lanterns containing them shall each be painted outside with the colour of the light they respectively contain, and shall be provided with proper screens.

Art. 7.—Steam vessels of less than 40, and vessels under oars or sails of less than 20, tons gross tonnage, respectively, and rowing boats, when under way, shall not be obliged to carry the lights mentioned in Article 2 (a) (b) and (c), but if they do not carry them they shall be provided with the following lights:—

1. *Steam vessels of less than 40 tons shall carry:*

- (a.) *In the fore part of the vessel, or on or in front of the funnel, where it can best be seen, and at a height above the gunwale of not less than 9 feet, a bright white light constructed and fixed as prescribed in Article 2 (a), and of such a character as to be visible at a distance of at least 2 miles.*

- (b.) *Green and red side-lights constructed and fixed as prescribed in Article 2 (b) and (c), and of such a character as to be visible at a distance of at least 1 mile, or a combined lantern showing a green light and a red light from right ahead to 2 points abaft the beam on their respective sides. Such lantern shall be carried not less than 3 feet below the white light.*
2. *Small steamboats, such as are carried by sea-going vessels, may carry the white light at a less height than 9 feet above the gunwale, but it shall be carried above the combined lantern mentioned in subdivision 1 (b).*
3. *Vessels under oars or sails, of less than 20 tons, shall have ready at hand a lantern with a green glass on one side and a red glass on the other, which, on the approach of or to other vessels, shall be exhibited in sufficient time to prevent collision, so that the green light shall not be seen on the port side nor the red light on the starboard side.*
4. *Rowing boats, whether under oars or sail, shall have ready at hand a lantern showing a white light, which shall be temporarily exhibited in sufficient time to prevent collision.*

The vessels referred to in this Article shall not be obliged to carry the lights prescribed by Article 4 (a), and Article 11, last paragraph.

Art. 8.—Pilot-vessels, when engaged on their station on pilotage duty, shall not show the lights required for other vessels, but shall carry a white light at the masthead, visible all round the horizon, and shall also exhibit a flare-up light or flare-up lights at short intervals, which shall never exceed fifteen minutes.

On the near approach of or to other vessels they shall have their side-lights lighted, ready for use, and shall flash or show them at short intervals, to indicate the direction in which they are heading, but the green light shall not be shown on the port side, nor the red light on the starboard side.

A pilot-vessel of such a class as to be obliged to go alongside of a vessel to put a pilot on board, may show the white light instead of carrying it at the masthead, and may, instead of the coloured lights above mentioned, have at hand ready for use a lantern with a green glass on the one side and a red glass on the other, to be used as prescribed above.

Pilot-vessels, when not engaged on their station on pilotage duty, shall carry lights similar to those of other vessels of their tonnage.

*Art. 9.**

Art. 10.—A vessel which is being overtaken by another shall show from her stern to such last-mentioned vessel a white light or a flare-up light.

The white light required to be shown by this Article may be fixed and carried in a lantern, but in such case the lantern shall be so constructed, fitted, and screened that it shall throw an unbroken light over an arc of the horizon of 12 points of the compass, viz., for 6 points from right aft on each side of the vessel, so as to be visible at a distance of at least 1 mile. Such light shall be carried as nearly as practicable on the same level as the side-lights.

Art. 11.—A vessel under 150 feet in length, when at anchor, shall carry forward, where it can best be seen, but at a height not exceeding 20 feet above the hull, a white light in a lantern so constructed as to show a clear, uniform, and unbroken light visible all round the horizon at a distance of at least 1 mile.

A vessel of 150 feet or upwards in length, when at anchor, shall carry in the forward part of the vessel, at a height of not less than 20, and not exceeding 40, feet above the hull, one such light, and at or near the stern of the vessel, and at such a height that it shall be not less than 15 feet lower than the forward light, another such light.

The length of a vessel shall be deemed to be the length appearing in her certificate of registry.

A vessel aground in or near a fairway shall carry the above light or lights and the two red lights prescribed by Article 4 (a).

Art. 12.—Every vessel may, if necessary in order to attract attention, in addition to the lights which she is by these Rules required to carry, show a flare-up light or use any detonating signal that cannot be mistaken for a distress signal.

Art. 13.—Nothing in these Rules shall interfere with the operation of any special rules made by the Government of any nation with respect to additional station and signal lights for two or more ships of war or for vessels sailing under convoy, or with the exhibition of recognition signals adopted by shipowners, which have been authorised by their respective Governments and duly registered and published.

Art. 14.—A steam vessel proceeding under sail only, but having her funnel up, shall carry in daytime, forward, where it can best be seen, one black ball or shape 2 feet in diameter.

SOUND-SIGNALS FOR FOG, &c.

Art. 15.—All signals prescribed by this Article for vessels under way shall be given:

1. *By "steam vessels" on the whistle or siren.*

2. *By "sailing vessels and vessels towed" on the fog-horn.*

The words "prolonged blast" used in this Article, shall mean a blast of from 4 to 6 seconds duration.

A steam vessel shall be provided with an efficient whistle or siren, sounded by steam or some substitute for steam, so placed that the sound may not be intercepted by any obstruction, and with an efficient fog-horn, to be sounded by mechanical means, and also with an efficient bell. A sailing vessel of 20 tons gross tonnage or upwards shall be provided with a similar fog-horn and bell.*

In fog, mist, falling snow, or heavy rain storms, whether by day or night, the signals described in this Article shall be used as follows, viz.:

(a.) *A steam vessel having way upon her, shall sound, at intervals of not more than 2 minutes, a prolonged blast.*

(b.) *A steam vessel under way, but stopped and having no way upon her, shall sound, at intervals of not more than 2 minutes, 2 prolonged blasts, with an interval of about 1 second between them.*

(c.) *A sailing-vessel under way shall sound, at intervals of not more than one minute, when on the starboard tack one blast, when on the port tack two blasts in succession, and when with the wind abaft the beam three blasts in succession.*

(d.) *A vessel, when at anchor, shall, at intervals of not more than one minute, ring the bell rapidly for about five seconds.*

(e.) *A vessel, when towing a vessel employed in laying or in picking up a telegraph cable, and a vessel under way, which is unable to get out of the way of an approaching vessel through being not under command, or unable to manœuvre as required by these Rules shall, instead of the signals prescribed in subdivisions (a) and (c) of this Article, at intervals of not more than 2 minutes, sound three blasts in succession, viz.: one prolonged blast followed by two short blasts. A vessel towed may give this signal and she shall not give any other.*

Sailing vessels and boats of less than 20 tons gross tonnage shall not be obliged to give the above-mentioned signals, but if they do not, they shall make some other efficient sound-signal at intervals of not more than 1 minute.

SPEED OF SHIPS TO BE MODERATE IN FOG, &c.

Art. 16.—Every vessel shall, in a fog, mist, falling snow, or heavy rain storms, go at a moderate speed, having careful regard to the existing circumstances and conditions.

A steam-vessel hearing, apparently forward of her beam, the fog-signal of a vessel the position of which is not ascertained, shall, so far as the circumstances of the case admit, stop her engines, and then navigate with caution until danger of collision is over.

STEERING AND SAILING RULES.

PRELIMINARY—RISK OF COLLISION.

Risk of collision can, when circumstances permit, be ascertained by carefully watching the compass bearing of an approaching vessel. If the bearing does not appreciably change, such risk should be deemed to exist.

Art. 17. When two sailing vessels are approaching one another, so as to involve risk of collision, one of them shall keep out of the way of the other, as follows, viz.:

(a.) *A vessel which is running free shall keep out of the way of a vessel which is close-hauled.*

(b.) *A vessel which is close-hauled on the port tack shall keep out of the way of a vessel which is close-hauled on the starboard tack.*

(c.) *When both are running free, with the wind on different sides, the vessel which has the wind on the port side shall keep out of the way of the other.*

(d.) *When both are running free, with the wind on the same side, the vessel which is to windward shall keep out of the way of the vessel which is to leeward.*

(e.) *A vessel which has the wind aft shall keep out of the way of the other vessel.*

Art. 18.—When two steam vessels are meeting end on, or nearly end on, so as to involve risk of collision, each shall alter her course to starboard, so that each may pass on the port side of the other.

This article only applies to cases where vessels are meeting end on, or nearly end on, in such a manner as to involve risk of collision, and does not apply to two vessels which must, if both keep on their respective courses, pass clear of each other.

* This Article will deal with regulations affecting fishing boats, and will be the subject of another Order, which will be submitted to Her Majesty for approval at a later date.

* In all cases where the Rules require a bell to be used a drum may be substituted on board Turkish vessels, or a gong where such articles are used on board small sea-going vessels.

The only cases to which it does apply are, when each of the two vessels is end on, or nearly end on, to the other; in other words, to cases in which, by day, each vessel sees the masts of the other in a line, or nearly in a line, with her own; and by night, to cases in which each vessel is in such a position as to see both the side lights of the other.

It does not apply, by day, to cases in which a vessel sees another ahead crossing her own course; or by night, to cases where the red light of one vessel is opposed to the red light of the other, or where the green light of one vessel is opposed to the green light of the other, or where a red light without a green light, or a green light without a red light, is seen ahead, or where both green and red lights are seen anywhere but ahead.

Art. 19.—When two steam-vessels are crossing, so as to involve risk of collision, the vessel which has the other on her own starboard side shall keep out of the way of the other.

Art. 20.—When a steam-vessel and a sailing-vessel are proceeding in such direction as to involve risk of collision, the steam-vessel shall keep out of the way of the sailing-vessel.

Art. 21.—Where by any of these rules one of two vessels is to keep out of the way, the other shall keep her course and speed.

Note.—When, in consequence of thick weather or other causes, such vessel finds herself so close that collision cannot be avoided by the action of the giving-way vessel alone, she also shall take such action as will best aid to avert collision. (*See Articles 27 and 29.*)

Art. 22.—Every vessel which is directed by these Rules to keep out of the way of another vessel shall, if the circumstances of the case admit, avoid crossing ahead of the other.

Art. 23.—Every steam-vessel which is directed by these Rules to keep out of the way of another vessel shall, on approaching her, if necessary, slacken her speed or stop or reverse.

Art. 24.—Notwithstanding anything contained in these Rules, every vessel, overtaking any other, shall keep out of the way of the overtaken vessel.

Every vessel coming up with another vessel from any direction more than two points abaft her beam, i.e., in such a position, with reference to the vessel which she is overtaking that at night she would be unable to see either of that vessel's sidelights, shall be deemed to be an overtaking vessel; and no subsequent alteration of the bearing between the two vessels shall make the overtaking vessel a crossing vessel within the meaning of these Rules, or relieve her of the duty of keeping clear of the overtaken vessel until she is finally past and clear.

As by day the overtaking vessel cannot always know with certainty whether she is forward of or abaft this direction from the other vessel, she should, if in doubt, assume that she is an overtaking vessel and keep out of the way.

Art. 25.—In narrow channels every steam-vessel shall, when it is safe and practicable, keep to that side of the fairway or mid-channel which lies on the starboard side of such vessel.

Art. 26.—Sailing vessels under way shall keep out of the way of sailing-vessels or boats fishing with nets, or lines, or trawls. This Rule shall not give to any vessel or boat engaged in fishing the right of obstructing a fairway used by vessels other than fishing-vessels or boats.

Art. 27.—In obeying and construing these rules, due regard shall be had to all dangers of navigation and collision, and to any special circumstances which may render a departure from the above Rules necessary to avoid immediate danger.

SOUND SIGNALS FOR VESSELS IN SIGHT OF ONE ANOTHER.

Art. 28.—The words "short blast" used in this Article, shall mean a blast of about one second's duration.

When vessels are in sight of one another, a steam vessel under way, in taking any course authorised or required by these Rules, shall indicate that course by the following signals on her whistle or siren, viz.:—

One short blast to mean, "I am directing my course to starboard."

Two short blasts to mean, "I am directing my course to port."

Three short blasts to mean, "My engines are going full speed astern."

NO VESSEL UNDER ANY CIRCUMSTANCES TO NEGLECT PROPER PRECAUTIONS.

Art. 29.—Nothing in these rules shall exonerate any vessel, or the owner, or master, or crew thereof, from the consequences of any neglect to carry lights or signals, or of any neglect to keep a proper look-out, or of the neglect of any precaution which may be required by the ordinary practice of seamen, or by the special circumstances of the case.

RESERVATION OF RULES FOR HARBOURS AND INLAND NAVIGATION.

Art. 30.—Nothing in these rules shall interfere with the operation of a special rule, duly made by local authority, relative to the navigation of any harbour, river, or inland waters.

SCHEDULE II. DISTRESS SIGNALS.

Art. 31.—When a vessel is in distress and requires assistance from other vessels or from the shore, the following shall be the signals to be used or displayed by her, either together or separately, viz.:—

In the daytime—

1. A gun or other explosive signal fired at intervals of about a minute;
2. The International Code signal of distress indicated by N C;
3. The distant signal, consisting of a square flag, having either above or below it a ball or anything resembling a ball;
4. A continuous sounding with any fog-signal apparatus.

At night—

1. A gun or other explosive signal fired at intervals of about a minute;
2. Flames on the vessel (as from a burning tar-barrel, oil-barrel, &c.);
3. Rockets or shells, throwing stars of any colour or description, fired one at a time, at short intervals;
4. A continuous sounding with any fog-signal apparatus.

And whereas by the Orders in Council dated, respectively, the twenty-fourth day of March, one thousand eight hundred and eighty, the twenty-sixth day of August, one thousand eight hundred and eighty-one, the eighteenth day of August, one thousand eight hundred and eighty-two, the twenty-third day of August, one thousand eight hundred and eighty-three, and the second day of February, one thousand eight hundred and eighty-four, Her Majesty was pleased to direct that the operation of the Article numbered 10, of the new Regulations contained in the First Schedule of the said Order in Council of the fourteenth day of August, one thousand eight hundred and seventy-nine, should be suspended from time to time:

And whereas the Admiralty and the Board of Trade have jointly recommended to Her Majesty that, so far as regards British Ships and Boats, the Regulations hereinafter set forth shall be substituted for the Regulations contained in the First Schedule to the said Order in Council of the fourteenth day of August, one thousand eight hundred and seventy-nine:

Now, therefore, Her Majesty, by virtue of the powers vested in Her by the said recited Act, and by and with the advice of Her Privy Council, is pleased to direct that, on and after the first day of September, one thousand eight hundred and eighty-four, the Regulations contained in the Schedule hereto shall, so far as regards British Ships and Boats, be substituted for the Regulations contained in the First Schedule to the said Order in Council of the fourteenth day of August, one thousand eight hundred and seventy-nine.

SCHEDULE REFERRED TO IN THIS ORDER.

Art. 10.—Open boats and fishing vessels of less than 20 tons net registered tonnage, when under way and when not having their nets, trawls, dredges, or lines in the water, shall not be obliged to carry the coloured side lights; but every such boat and vessel shall in lieu thereof have ready at hand a lantern with a green glass on the one side and a red glass on the other side, and on approaching to or being approached by

another vessel such lantern shall be exhibited in sufficient time to prevent collision, so that the green light shall not be seen on the port side nor the red light on the starboard side.

The following portion of this Article applies only to fishing vessels and boats when in the sea off the coast of Europe lying north of Cape Finisterre :—

- (a) All fishing vessels and fishing boats of 20 tons net registered tonnage, or upwards, when under way and when not required by the following regulations in this Article to carry and show the lights therein named, shall carry and show the same lights as other vessels under way.
- (b) All vessels when engaged in fishing with drift nets shall exhibit two white lights from any part of the vessel where they can be best seen. Such lights shall be placed so that the vertical distance between them shall be not less than 6 feet and not more than 10 feet; and so that the horizontal distance between them measured in a line with the keel of the vessel shall be not less than 5 feet and not more than 10 feet. The lower of these two lights shall be the more forward, and both of them shall be of such a character, and contained in lanterns of such construction as to show all round the horizon, on a dark night with a clear atmosphere, for a distance of not less than three miles.
- (c) A vessel employed in line fishing with her lines out shall carry the same lights as a vessel when engaged in fishing with drift nets.
- (d) If a vessel when fishing becomes stationary in consequence of her gear getting fast to a rock or other obstruction, she shall show the light and make the fog signal for a vessel at anchor.
- (e) Fishing vessels and open boats may at any time use a flare-up in addition to the lights which they are by this Article required to carry and show. All flare-up lights exhibited by a vessel when trawling, dredging, or fishing with any kind of drag net shall be shown at the after part of the vessel, excepting that, if the vessel is hanging by the stern to her trawl, dredge, or drag net, they shall be exhibited from the bow.
- (f) Every fishing vessel and every open boat when at anchor between sunset and sunrise shall exhibit a white light visible all round the horizon at a distance of at least one mile.
- (g) In fog, mist, or falling snow, a drift net vessel attached to her nets, and a vessel when trawling, dredging, or fishing with any kind of drag net, and a vessel employed in line fishing with her lines out, shall at intervals of not more than two minutes make a blast with her fog-horn and ring her bell alternately.

At the Court at Osborne House, Isle of Wight, the 30th day of December, 1884.

Present :

The Queen's Most Excellent Majesty in Council.

WHEREAS by an Order in Council made in pursuance of the Merchant Shipping Act Amendment Act, 1862, and dated the 11th day of August, 1884, Her Majesty on the joint recommendation of the Admiralty and the Board of Trade, was pleased to direct that on and after the 1st day of September, 1884, the Regulations in the Schedule thereto should, so far as regarded British ships and boats, be substituted for the Regulations for preventing collisions at sea contained in the First Schedule to an Order in Council made as aforesaid and dated the 14th day of August, 1879 :

And whereas by the Regulations contained in the Schedule to the same Order in Council of the 11th day of August, 1884, it is provided as follows, viz.:—

Art. 3.—A seagoing steamship when under way shall carry—

- (a) On or in front of the foremast, at a height above the hull of not less than 20 feet, and if the breadth of the ship exceeds 20 feet, then at a height above the hull not less than such breadth, a bright white light, so constructed as to show an uniform and unbroken light over an arc of the horizon of 20 points of the compass, so fixed as to throw the light 10 points on each side of the ship—viz, from right ahead to two points abaft the beam on either side, and of such a character as to be visible on a dark night, with a clear atmosphere, at a distance of at least five miles.
- (b) On the starboard side, a green light so constructed as to show an uniform and unbroken light over an arc of the horizon of ten points of the compass, so fixed as to throw the light from right ahead to two points abaft the beam on the starboard side, and of such a character as to be visible on a dark night, with a clear atmosphere, at a distance of at least two miles.

- (c) On the port side, a red light, so constructed as to show an uniform and unbroken light over an arc of the horizon of 10 points of the compass, so fixed as to throw the light from right ahead to two points abaft the beam on the port side, and of such a character as to be visible on a dark night, with a clear atmosphere, at a distance of at least two miles.

- (d) The said green and red side lights shall be fitted with inboard screens projecting at least three feet forward from the light, so as to prevent these lights from being seen across the bow.

Art. 6.—A sailing ship under way, or being towed, shall carry the same lights as are provided by Article 3 for a steamship under way, with the exception of the white light, which she shall never carry.

Art. 10.—

- (a.) All fishing vessels and fishing boats of 20 tons net registered tonnage, or upwards, when under way and when not required by the following Regulations in this Article to carry and show the lights therein named, shall carry and show the same lights as other vessels under way.

And whereas the Admiralty and the Board of Trade have, in pursuance of the said recited Act, jointly recommended to Her Majesty that the Regulations contained in the Schedule to the said recited Order in Council of the 11th day of August, 1884 shall as regards British fishing vessels and boats when in the sea off the coast of Europe, lying north of Cape Finisterre, be modified and added to in manner following; that is to say,—

That as regards steam vessels engaged in trawling, such vessels, if of 20 tons gross register tonnage or upwards, and having their trawls in the water, and not being stationary in consequence of their gear getting fast to a rock or other obstruction, should, if they do not carry the lights required by the said recited Article 3 of the Regulations aforesaid, be permitted to carry and show in lieu thereof and in substitution therefor, but not in addition thereto, whilst so engaged in trawling, and having their trawls in the water, and not being stationary as aforesaid, other lights of the description set forth in Part I. of the Schedule hereto; and that when under way, and not having their trawls in the water, they should carry and show the lights required by Article 3 above recited :

And that as regards sailing vessels engaged in trawling, such vessels, if of 20 tons net register tonnage or upwards, and having their trawls in the water, and not being stationary in consequence of their gear getting fast to a rock or other obstruction, should, if they do not carry the lights required by the said recited Article 6 of the Regulations aforesaid, be permitted to carry and show in lieu thereof and in substitution therefor, but not in addition thereto, whilst so engaged in trawling, and having their trawls in the water, and not being stationary as aforesaid, other lights of the description set forth in Part II. of the Schedule hereto; and that when under way, and not having their trawls in the water, they should carry and show the lights required by Article 6 above recited.

Now, therefore, Her Majesty, by virtue of the powers vested in Her by the said Act, and by and with the advice of Her Privy Council, is pleased to direct that on and after the first day of January, 1885, the Regulations contained in the Schedule to the said recited Order in Council of the 11th day of August, 1884, shall, as regards British fishing vessels and boats when in the sea off the coast of Europe, lying north of Cape Finisterre, be modified and added to as follows, viz.:—

As regards steam vessels engaged in trawling when under steam, such vessels, if of 20 tons gross register tonnage or upwards, and having their trawls in the water, and not being stationary in consequence of their gear getting fast to a rock or other obstruction, shall between sunset and sunrise either carry and show the lights required by the said recited Article 3 of the Regulations aforesaid, or shall carry and show in lieu thereof and in substitution therefor, but not in addition thereto, other lights of the description set forth in Part I. of the Schedule hereto :

As regards sailing vessels engaged in trawling, such vessels, if of 20 tons net register tonnage or upwards, and having their trawls in the water, and not being stationary in consequence of their gear getting fast to a rock or other obstruction, shall between sunset and sunrise either carry and show the lights required by the said recited Article 6 of the Regulations aforesaid, or shall carry and show in lieu thereof and in substitution therefor, but not in addition thereto, other lights of the description set forth in Part II. of the Schedule hereto.

The red and green lights, which are by this Order permitted as aforesaid to be carried in lieu of the lights required by Articles 3 and 6 of the said recited Regulations respectively, shall be of such a character as to be visible at a distance of not less than two miles on a dark night, with a clear atmosphere.

And Her Majesty is pleased further to direct that steam vessels of 20 tons gross register tonnage or upwards, and sailing vessels of 20 tons net register tonnage or upwards, engaged in trawling, when under way between sunset and sunrise, but not having their trawls in the water, shall, if steam ships, carry and show the lights required by Article 3 above recited, and if sailing ships, shall carry and show the lights required by Article 6 above recited: Provided, however, that the modifications and additions set forth in Parts I. II., of the Schedule hereto shall not be applicable to the fishing vessels and boats of any foreign country, unless and until the same shall have been made applicable thereto by Order in Council.

C. L. PEEL.

SCHEDULE.

PART I.—STEAM VESSELS.

On or in front of the foremast head and in the same position as the white light which other steamships are required to carry, a lantern, showing a white light ahead, a green light on the starboard side, and a red light on the port side; such lantern shall be so constructed, fitted, and arranged as to show an uniform and unbroken white light over an arc of the horizon of four points of the compass, an uniform and unbroken green light over an arc of the horizon of 10 points of the compass, and an uniform and unbroken red light over an arc of the horizon of 10 points of the compass, and it shall be so fixed as to show the white light from right ahead to two points on the bow on each side of the ship, the green light from two points on the starboard bow to four points abaft the beam on the starboard side, and the red light from two points on the port bow to four points abaft the beam on the port side: and (2) a white light in a globular lantern of not less than eight inches in diameter, and so constructed as to show a clear, uniform, and unbroken light all round the horizon; the lantern containing such white light shall be carried lower than the lantern showing the green, white, and red lights as aforesaid, so, however that the vertical distance between them shall not be less than 6 feet nor more than 12 feet.

PART II.—SAILING VESSELS.

(1.) On or in front of the foremast head a lantern having a green glass on the starboard side and a red glass on the port side, so constructed, fitted, and arranged that the red and green do not converge, and so as to show an uniform and unbroken green light over an arc of the horizon of 12 points of the compass, and an uniform and unbroken red light over an arc of the horizon of 12 points of the compass, and it shall be so fixed as to show the green light from right ahead to four points abaft the beam on the starboard side, and the red light from right ahead to four points abaft the beam on the port side: and (2) a white light in a globular lantern of not less than eight inches in diameter, and so constructed as to show a clear, uniform, and unbroken light all round the horizon; the lantern containing such white light shall be carried lower than the lantern showing the green and red lights as aforesaid, so, however, that the vertical distance between them shall not be less than 6 feet and not more than 12 feet.

At the Court at Windsor, the 24th day of June, 1885.

Present:

The Queen's Most Excellent Majesty in Council.

WHEREAS by an Order in Council made in pursuance of the Merchant Shipping Act Amendment Act, 1862, and dated the 30th day of December, 1884, Her Majesty, on the joint recommendation of the Admiralty and the Board of Trade, was pleased to direct that on and after the first day of January, 1885, the Regulations contained in the Schedule to an Order in Council made as aforesaid, and dated the 11th day of August, 1884, should, as regards British fishing vessels and boats, when in the sea off the coast of Europe lying north of Cape Finisterre, be modified and added to, *inter alia*, as follows, viz.:—

As regards sailing vessels engaged in trawling, such vessels, if of 20 tons net register tonnage or upwards, and having their trawls in the water, and not being stationary in consequence of their gear getting fast to a rock or other obstruction, shall between sunset and sunrise either carry and show the lights required by Article 6 of the Regulations aforesaid, or shall carry and show in lieu thereof, and in substitution thereof, but not in addition thereto, other lights of the description set forth in Part II. of the Schedule to the said recited Order in Council of the 30th day of December, 1884.

And whereas the Admiralty and the Board of Trade have, in pursuance of the said recited Act, jointly recommended to Her Majesty that the Regulations contained in the Schedule to the said recited Order in Council of the 11th day of August, 1884, shall, as regards sailing vessels when engaged in trawling, be further modified and added to in manner following; that is to say,—

As regards sailing vessels engaged in trawling, such vessels having their trawls in the water and not being stationary in consequence of their gear getting fast to a rock or other obstruction, if they do not carry and show the lights required by Article 6 of the Regulations aforesaid, or the other lights of the description set forth in Part 2 of the Schedule to the said recited Order in Council of the 30th of December, 1884, shall carry and show in lieu of the lights required by Article 6 of the Regulations aforesaid, or the other lights of the description set forth in paragraph 2 of the Schedule to the said recited Order, other lights as follows; that is to say,—

A white light in a globular lantern of not less than eight inches in diameter, and so constructed as to show a clear uniform and unbroken light all round the horizon, and visible on a dark night, with a clear atmosphere, for a distance of at least two miles; and also a sufficient supply of red pyrotechnic lights which shall each burn for at least thirty seconds, and shall, when so burning, be visible for the same distance under the same conditions as the white light. NOTICE TO MASTERS OF VESSELS NAVIGATING THE BRISBANE RIVER.

NOTICE is hereby given, that several ridges with 14 feet over them at low-water spring tides have formed in the Outer Bar Cutting, from opposite the west beacon to about 300 yards beyond the tide-gauge pile.

TENDERS will be received at the Office of the Under Secretary and Superintendent of Telegraphs, Brisbane, until Noon on MONDAY, the Seventeenth day of May, 1897, from persons desirous of contracting for the supply of Telegraph Poles and Struts wherever required at or between the stations named, according to the terms, general conditions, and specifications appended hereto.

Tenders must state—

£ s. d.

1. Price, per pole, for poles up to twenty-seven (27) feet in length
2. Price, per foot, for extra length of poles where necessary (extra length will mean for each additional foot above 27 feet)
3. Price, per strut, for struts up to twenty-one (21) feet three (3) inches in length
4. Price, per foot, for extra length of struts where necessary (extra length will mean for each additional foot above 21 feet 3 inches)

General Conditions.

1. The words "Inspecting Officer" throughout these conditions and specifications shall mean any officer appointed by the Postmaster-General to supervise the work.

2. The word "Contractor" throughout these conditions and specifications shall mean all and any of the partners of a firm, or any single individual.

3. The delivery of the poles and struts must be commenced within two (2) weeks of the notification of the acceptance of the Tender, and delivery must be continued at such a rate that the maintenance party erecting the poles and struts may be kept fully employed until delivery is completed. If, through any default of the contractor or his employees, any delay in delivery occurs by which the maintenance party is compelled to cease work, the contractor shall forfeit and pay to the Government, as and for liquidated and ascertained damages, the sum of two (2) pounds per day for every day or part of a day during which the maintenance party have been idle, and the amount of such damages may be deducted by the Government from any money payable to the contractor under this contract.

4. The contractor must deliver the poles and struts where required by the inspecting officer. Delivery will not be taken, nor will the poles be inspected until laid where required.

5. The inspecting officer will have full power at any time prior to payment to reject and condemn any pole or strut which is in his opinion unfit for the purpose intended.

Any pole or strut so rejected or condemned must be removed by the contractor within a week or the Government will remove same at the contractor's expense.

6. Payment will be made monthly to the extent of seventy-five (75) per cent. on the value of the poles and struts reported to have been delivered by the officer appointed to inspect the same; the total balance will be paid when the entire contract shall have been completed to the satisfaction of the Government.

7. No action or suit shall be brought or maintained by the contractor or the Under Secretary and Superintendent of Telegraphs against the other of them to recover any money for or in respect of or arising out of this contract, or any breach thereof by the contractor or the Under Secretary and Superintendent of Telegraphs, or for or in respect of any other matter or thing arising out of this contract, unless and until the contractor or the Under Secretary and Superintendent of Telegraphs has obtained a certificate of the inspecting officer for the amount sued for, and then only for the amount so certified.

8. The contractor will be responsible for all claims for compensation for damage to fences or other property caused by the delivery of the poles and struts, also for damage so caused to roads or the railway works; and if such claims are not defrayed, the Under Secretary and Superintendent of Telegraphs is authorised to pay the same from any moneys due to the contractor.

9. Should the contractor fail to proceed in the execution of, or to complete, the contract in the manner and at the rate of progress required by the Postmaster-General, it shall be lawful for the Postmaster-General, by a notice in writing delivered to the contractor or his representative, or by a notice in the *Queensland Government Gazette*, to terminate the contract, as far as relates to the work remaining to be done, and to enforce the penalties for the non-fulfilment of the contract; and all sums of money which may be due to the contractor shall be forfeited to the Government, and the amount shall be considered as ascertained damages for breach of contract.

10. A deposit of Five (5) pounds must accompany each Tender (without which Tenders will be informal), also a copy of these conditions and specifications signed by the contractor and duly witnessed.

11. All workmen and employees engaged upon this work by the contractor shall be paid their full wages in lawful money, at least once in every month.

12. Such payments shall be made in some building or other convenient place, but in no case shall such payments be made at any public-house or other place where liquors or refreshments are sold.

13. The contractor shall not sell or dispose of, or be in any way interested in the sale or disposal of, alcoholic liquors or other articles of consumption, to the workmen or employees engaged upon the works.

14. If the contractor sublets any portion of the contract, all workmen and employees engaged thereon shall be paid by the sub-contractor at the times and under the conditions herein specified, but in the event of the sub-contractor failing to make any such payments then the contractor shall be liable to make the same.

15. Before the payment of any money to the contractor, the Postmaster-General may require from him satisfactory evidence that all the workmen and employees then and theretofore engaged on this contract have been paid their wages and other lawful claims of every kind in full, in lawful money, and to the latest date at which such wages and claims are due; and the Postmaster-General may withhold the payment of all moneys due or that may become due to the contractor, until he is satisfied that such wages and claims have been paid.

16. If the contractor fails or omits to pay to any workmen or employees engaged upon the contract their full wages in cash once at least in every month, the Postmaster-General may, as often as the same shall happen, upon complaint of such failure or omission made, and upon evidence satisfactory to him of an order or judgment of a Court of Petty Sessions, or of any other court of competent jurisdiction, pay the amount mentioned in such order to such workmen or employees, and deduct the amounts so paid from any sum or sums which may be due or become due to the contractor.

17. Although the Under Secretary and Superintendent of Telegraphs or his officers may furnish any information in connection with this contract, any such information shall not relieve the contractor from any risk or from the fulfilment of his contract, nor will the fact of any such information being given entitle the contractor to make any claim for compensation.

18. The inspecting officer shall have the power to order the dismissal or removal of any foreman or workman employed by the contractor upon giving written notice to the contractor of his intention to do so; and if such foreman or workman is retained by the contractor after such notice has been given, then the inspecting officer shall have the power to delay the signing of any voucher or certificate for payment for any work done until such order has been obeyed.

19. The decision of the Government Electrical Engineer will be final in all matters of dispute between the contractors and the Government in regard to this contract.

20. The Government does not bind itself to accept the lowest or any Tender.

Specification.

1. Poles and struts to be of the best description of narrow-leaved ironbark, or other approved timber (the approval of any timber will rest with the Government).

2. Each pole and strut to be straight, and to have the bark removed.

3. Each pole and strut to be free from pipes, cracks, splits, knots, grub-holes, gum-veins, and all other defects of any kind whatsoever.

4. Poles on the direct line to be not less than seven (7) inches in the least diameter, clear of sapwood, at the small end, and not less than thirty-three (33) inches in circumference at five (5) feet from the butt. Poles on the line *via* Spring Bluff and Murphy's Creek to be not less than six (6) inches in the least diameter, clear of sapwood, at the small end, and not less than thirty-one (31) inches in circumference at five (5) feet from the butt. Poles on either line to be not less than twenty-seven (27) feet in length. For each additional five (5) feet, or fraction of five (5) feet, in length, the measurement at five (5) feet from the butt shall be increased by three (3) inches in circumference.

5. Struts are not to be less than twenty-one (21) feet three (3) inches in length, to be sawn off square at the butt, to be not less than six (6) inches, clear of sapwood, in the least diameter at the small end, and not less than twenty-six (26) inches in circumference at the butt.

6. Poles and struts to be well and carefully charred on the butt, and from thence upwards for six (6) feet.

7. There will be about 112 poles and 95 struts required on the direct line from Toowoomba to Helidon; there will be about 190 poles and 132 struts between Toowoomba and Helidon, *via* Spring Bluff and Murphy's Creek; but the Government reserve the right to either increase or diminish the number of poles and struts required, or to alter the lengths of the poles, on either line, as may be found necessary; any such alterations to be paid for at schedule rates; and the contractor will have no claim against the Government in respect to any such alterations for either increase or diminution in the number of poles or struts, or for any misstatement of quantities.

Any further information may be obtained on application at the Office of the Under Secretary and Superintendent of Telegraphs, Brisbane, and at the Telegraph Office, Toowoomba.

No. 88.

In continuation of General Order No. 76 of 1897, the Commandant wishes to compliment the Force which marched from Lytton to Brisbane on the efficient manner in which the day's work was performed.

A march is always a test of efficiency—time being a most important factor in all military operations. In this particular march the hours of departure and arrival between certain given points were strictly adhered to, which enabled the Commandant to judge of the reliability of the marching power of Corps, both mounted and dismounted.

The march of fourteen miles was a trying one. The weather was hot and the roads thick with dust, yet the springy step with which the Infantry (including the Cadets of the Grammar School) marched into Brisbane showed that under more favourable conditions a considerably longer march could have been executed without loss of fighting efficiency.

No. 89.

THE undermentioned Recruits, having completed twenty drills, were inspected by the Staff Officer named, at the place and on the date stated, and those whose names are published as having passed may now be taken on the strength of their respective Corps as trained men:—

NOTE.—There are on an average 20 poles to the mile on the existing line from North Rockhampton to the Junction near Nankin Creek. From North Rockhampton to Lake's Creek is about $2\frac{1}{4}$ miles, thence to Nankin Creek about $6\frac{1}{4}$ miles.

- (11) Price, per strut, for strutting (to include providing and fitting all struts—either on existing or on new line—fixing all bolts, fitting, and all other work in connection therewith). This price will include providing and fitting struts for

extra poles. Strutting is to be done only at such angles as the inspecting officer directs. The number of struts cannot be stated. There will be about 6 on the new line between the Junction, near Nankin Creek, and Broadmount

- (12) Price, per block, for base blocks for struts and poles, including bolts (base blocks are to be supplied only where directed by the inspecting officer). The number of base blocks cannot be stated
- (13) Price, per block, for stay blocks, to be used at such angles as the inspecting officer may direct. There will be about 93 poles to be fitted with stay blocks between the Junction, near Nankin Creek, and Broadmount

The Government do not guarantee that the above quantities, or distances, are correct. They are given to enable tenderers to arrive at an approximate total tender cost of the whole work. If there should be a greater or lesser number of any of the above items, or if the distances should prove to be incorrect, the contractor will be paid for work done at his schedule price, and he will have no claim against the Government in either case for any misstatement of quantities or distances.

This contract will include the stretching of an additional wire from Rockhampton Railway Station along existing poles to the junction of the Broadmount Extension, near Nankin Creek, a distance of 10 miles 30 chains more or less, repairing the existing line where necessary between North Rockhampton Railway Station and the Junction of the Broadmount Extension, and the construction of a new telegraph line, from the junction, near Nankin Creek, to Broadmount, a distance of 15 miles 25 chains more or less.

The Government reserve the right to deviate from either road or railway if any such deviation should be found advisable; the work on any such deviation to be paid for at schedule rates.

General Conditions.

1. The words "Inspecting Officer" throughout these conditions and specification shall mean any officer appointed by the Postmaster-General to supervise the work.

2. The word "Contractor" throughout these conditions and specification shall mean all and any of the partners of a firm, or any single individual.

3. The wire insulators, insulator bolts, brackets, screws, galvanised iron roofs, roof nails, lightning conductors, staples for lightning conductors, and bolts for struts will be supplied by the Government and delivered to the contractor in Brisbane. Any surplus material after the completion of the contract must be delivered by the contractor, free of charge, at Rockhampton Telegraph Office.

4. The whole of the works included in this contract must be completed and handed over to the Government within two (2) months of the notification of the acceptance of the tender; and should the completion of the works be delayed beyond that date, the contractor shall forfeit and pay to the Government, as and for liquidated and ascertained damages, the sum of five pounds sterling for every week or part of a week that shall elapse after such date until their completion, and the amount of such damages may be deducted by the Government from any money payable to the contractor under this contract.

5. Payment will be made monthly to the extent of seventy-five (75) per cent. on the value of the work reported to have been completed by the officer appointed to inspect the same; but, notwithstanding such report and payment on account, the Under Secretary and Superintendent of Telegraphs, or other officer appointed by him in that behalf, shall have full power at any time afterwards, before final payment shall be made, of rejecting and condemning any of the work or materials in respect of which such report and payments may have been made. Certificates must be produced from the Chairmen of the Divisional Boards through whose Divisions the line passes or has been taken, and from property owners if through or near the boundaries of private lands, that no claims are made by them under Clause 7, before final payment will be made. The total balance will be paid when the entire contract shall have been completed and all claims settled to the satisfaction of the Government.

6. The Government reserves to itself the right to make use of the line for the transmission of messages prior to final completion. Such use of the line not to prejudice in any way the power to subsequently reject or condemn any portion of the work or materials.

7. The contractor may avail himself of the facilities afforded by "The Post and Telegraph Act, 1891," for obtaining materials, on signing a bond indemnifying the Government against any claims for compensation arising from the action of the contractor: Provided always that it shall be lawful for the Under Secretary and Superintendent of Telegraphs, from moneys due to the contractor, if not otherwise settled, to satisfy any such claim he may see fit,

8. No action or suit shall be brought or maintained by the contractor or the Under Secretary and Superintendent of Telegraphs against the other of them to recover any money for or in respect of or arising out of this contract, or any breach thereof by the contractor or the Under Secretary and Superintendent of Telegraphs, or for or in respect of any other matter or thing arising out of this contract, unless and until the contractor or the Under Secretary and Superintendent of Telegraphs has obtained a certificate of the inspecting officer for the amount sued for, and then only for the amount so certified.

9. The contractor will have to provide, at his own cost, all labour, plant, tools, material (other than that mentioned in Clause 3 of these conditions), or whatever else may be required for the due performance of this contract.

10. The contractor will be responsible for all claims for compensation for damage to fences or other property caused by the erection of the line, also for damage so caused to roads or the railway works; and if such claims are not defrayed, the Under Secretary and Superintendent of Telegraphs is authorised to pay the same from any moneys due to the contractor.

11. Should the contractor fail to proceed in the execution of, or to complete, the work in the manner and at the rate of progress required by the Postmaster-General, it shall be lawful for the Postmaster-General, by a notice in writing delivered to the contractor or his representative, or by a notice in the *Queensland Government Gazette*, to terminate the contract, as far as relates to the work remaining to be done, and to enforce the penalties for the non-fulfilment of the contract; and all sums of money which may be due to the contractor, together with all plant, materials, and implements in his possession on the ground, and all sums of money, whether named in the bond to be entered into by the contractor and his sureties, or otherwise, as penalties for the non-fulfilment of the contract, shall be forfeited to the Government, and the amount shall be considered as ascertained damages for breach of contract.

12. A deposit of a sum equal to ten (10) per cent. of the total tender cost of the whole work must accompany each Tender (without which Tenders will be informal), also a memorandum signed by the party tendering, and two responsible persons as sureties, agreeing to be answerable for the due performance of the contract within the time stipulated, in the event of the Tender being accepted, and undertaking in that event that they will severally execute and deliver at the Office of the Under Secretary and Superintendent of Telegraphs, in Brisbane, within ten (10) days from the date of the notification of the acceptance of the Tender, a bond to Her Majesty in a sum equal to twenty (20) per cent. on the amount of the Tender.

13. All workmen and employees engaged upon the works by the contractor shall be paid their full wages in lawful money, at least once in every month.

14. Such payments shall be made in some building or place convenient to the site of the works, but in no case shall such payments be made at any public-house or other place where liquors or refreshments are sold.

15. The contractor shall not sell or dispose of, or be in any way interested in the sale or disposal of, alcoholic liquors or other articles of consumption, to the workmen or employees engaged upon the works.

16. If the contractor sublets any portion of the works, all workmen and employees engaged thereon shall be paid by the sub-contractor at the times and under the conditions herein specified, but in the event of the sub-contractor failing to make any such payments then the contractor shall be liable to make the same.

17. Before the payment of any money to the contractor, the Postmaster-General may require from him satisfactory evidence that all the workmen and employees then and theretofore engaged upon the works have been paid their wages and other lawful claims of every kind in full, in lawful money, and to the latest date at which such wages and claims are due; and the Postmaster-General may withhold the payment of all moneys due or that may become due to the contractor, until he is satisfied that such wages and claims have been paid.

18. If the contractor fails or omits to pay to any workmen or employees engaged upon the works their full wages in cash once at least in every month, the Postmaster-General may, as often as the same shall happen, upon complaint of such failure or omission made, and upon evidence satisfactory to him of an order or judgment of a Court of Petty Sessions, or of any other court of competent jurisdiction, pay the amount mentioned in such order to such workmen or employees, and deduct the amounts so paid from any sum or sums which may be due or become due to the contractor.

19. Although the Under Secretary and Superintendent of Telegraphs or his officers may furnish any information in connection with this contract, any such information shall not relieve the contractor from any risk or from the fulfilment of his contract, nor will the fact of any such information being given entitle the contractor to make any claim for compensation.

20. The inspecting officer shall have the power to order the dismissal or removal of any foreman or workman employed

by the contractor upon giving written notice to the contractor of his intention to do so; and if such foreman or workman is retained by the contractor after such notice has been given, then the inspecting officer shall have the power to delay the signing of any voucher or certificate for payment for any work done until such order has been obeyed.

21. The decision of the Government Electrical Engineer will be final in all matters of dispute between the contractors and the Government in regard to this contract.

22. The contractor must shift camp for the inspecting officer as required.

23. The Government does not bind itself to accept the lowest or any Tender.

Specification.

1. The course of the line to be marked out by the contractor, under the direction of the inspecting officer.

2. The clearing, where necessary, to be carried out in accordance with and in the manner specified in Clauses 3, 4, 5, and 6. Clearing is only to be done in such places as the inspecting officer may direct.

3. All trees, dead timber, and underwood standing within forty (40) feet on one side of the line to be felled; and all fallen timber, whether felled by the contractor or otherwise, within a radius of twenty (20) feet from each pole or strut, also for six (6) feet outside the railway fence or course of same, to be cleared away. Where the line is not within the railway fences, all trees, dead timber, and underwood standing within forty (40) feet of each side of the line to be felled, and all fallen timber, whether felled by the contractor or otherwise, within a radius of twenty (20) feet from each pole or strut, to be cleared away. Where the line is not within the railway fences a bridle track of not less than eight (8) feet in width shall be left in the centre of the clearing. Such track shall be cleared of all fallen timber whether felled by the contractor or otherwise.

4. Any branches overhanging from trees beyond the distance mentioned, which, in the judgment of the inspecting officer, might endanger the line, to be removed. Every care must be taken not to damage fencing or any other property of any kind or the railway works.

5. Trees outside the distance mentioned, which, in the judgment of the inspecting officer, might endanger the line, are to be felled.

6. All existing cleared roads which may become blocked by fallen timber must be cleared by the removal of the timber to the original width of such roadway. In cases where tracks may become blocked, all fallen timber must be removed, leaving a clear space of not less than twenty (20) feet in width, following the course of such track.

7. Poles to be straight saplings of the best description of narrow-leaved ironbark or other approved timber (the approval of any timber will rest with the Government), with the bark removed, not less than six (6) inches in the least diameter, clear of sapwood, at the small end, and not less than thirty-two (32) inches in circumference at five (5) feet from the butt, and not less than twenty-seven (27) feet in length; to be carefully and thoroughly charred from the butt upwards to one (1) foot above the ground, the charred portion to be well coated with hot coal tar. Extra-length poles to be three (3) inches greater in circumference at five (5) feet from the butt for each additional five (5) feet in length and to be charred from the butt upwards to one (1) foot above the ground irrespective of the depth in the ground, the charred portion to be well coated with hot coal tar.

8. The top of each pole to be sawn off with a bevel of one (1) in one (1) on each side, so as to leave an equal slope on each side of the pole. Over the top thus formed a galvanised iron roof is to be neatly nailed to the pole with four (4) two (2) inch clout nails, two nails on each side. The iron roof thus formed must project beyond the poles on all sides about two (2) inches.

9. Brackets to be fastened to the poles with three (3) inch coach screws. The sapwood must always be cut away to allow the base of the bracket to fit close to the pole.

The top bracket must be fixed nine (9) inches from the top of the pole, and on the right-hand side looking to the "Up" station (Brisbane side); if any further brackets are required they are to be placed alternately on opposite sides of the poles, and spaced seven (7) inches apart. They must not be fixed opposite to each other (in the same horizontal plane), but carefully spaced as instructed above. At every angle where, in the event of a wire leaving an insulator, there is the possibility of an accident, however slight, an iron insulator pin must be used, and the wire fastened on the inside of the insulator. Brackets must always be at right angles to the line of wires, except at angles, in which case the angle must be equally divided.

10. Lightning conductors to be of No. 8 gauge galvanised iron wire, to be stretched straight from the top to the butt of each pole, and to be secured thereto with fourteen (14) staples of galvanised iron wire one and a-half (1½) inches in length. Staples bent in driving must be drawn and replaced by straight ones. The top of the conductor to be twisted once round a three (3) inch coach screw driven four (4) inches below the

top of the pole, and then bent so that it will project not less than six (6) inches above the iron roof on the top of the pole, but without touching the roof; the other end of the conductor to be bent under the butt of the pole. If the poles exceed the specified length, the lightning conductors shall be proportionately longer, and an additional staple shall be driven for every two (2) feet additional length. Where poles are alongside roads, the staples to be driven at every foot from the ground to a height of eight (8) feet. Lightning conductors to be affixed to the poles midway between the brackets, and always on the "Down" side of the pole.

11. The poles to be not more than eighty-eight (88) yards apart, unless specially directed; to be sunk five (5) feet in the ground, placed in a perpendicular position, and well rammed with rubble and earth. Extra-length poles to be sunk any extra depth in ground that the inspecting officer may direct.

12. At angles and other places where required, struts are to be supplied and fitted. Struts are to be of approved timber (approval rests with the Government); to be about twenty-one (21) feet three (3) inches in length, sawn off square at the butt; to be not less than six (6) inches, clear of sapwood, in the least diameter at the small end, and not less than twenty-four (24) inches in circumference at the butt. Struts should not weaken the pole; therefore as little as possible of the timber of the pole inside the sapwood should be cut away at the joint. The small end of the strut is to be carefully and neatly scarfed to fit the pole at seventeen (17) feet from the ground level for a twenty-seven (27) foot pole. The joint must be neat and well fitting. A one-half ($\frac{1}{2}$) inch bolt is to be used to fasten the head of the strut to the pole. The inspecting officer will give instructions as to the angle at which the strut is to be placed against the pole. Struts are to be charred on the butt and from thence upwards to one (1) foot above ground, the charred portion to be well coated with hot coal tar.

13. At such angles as the Inspecting Officer directs, instead of a strut, a block of timber shall be firmly wedged against the pole in such a way that it will bear against the strain. The earth is to be excavated to form a trench in which the stay-block will be buried. Such trench must be of sufficient depth to allow the stay-block to lie not less than four (4) inches below the natural surface of the ground. The trench shall be of such dimensions that the stay-block will fit into it tightly; it must be sunk in a direction transverse to the strain on the angle pole, and the log must be driven tight against the pole with timber wedges at each end. The dimensions of such stay-blocks shall be six (6) feet in length, twelve (12) inches in diameter, clear of sapwood at the smallest end and of timber approved by the Inspecting Officer. The sapwood must be removed from both pole and block where they come in contact, and both must be carefully charred and well coated with hot coal tar. All loose charcoal must be scraped off both pole and stay-block where they are in contact.

14. Where the inspecting officer so directs, a block is to be securely fitted to the foot of the strut. The ground must be undercut to take the strut block, so that any pull may be against unmade ground. In the event of the inspecting officer so directing, a base block must also be fitted to such poles. Base-blocks to be fitted transversely to either pole or strut and at a distance of 12 inches from the butt.

15. Dimensions of base blocks for these purposes to be three (3) feet in length by eight (8) inches in diameter, clear of sapwood. The block must be thoroughly charred and coated with hot coal tar before it is bolted to the pole. Any loose charcoal must be scraped off both strut, pole, and block before being bolted together. Blocks to be bolted to either struts or poles with half ($\frac{1}{2}$) inch bolts. Struts must be not less than three (3) feet in the ground.

16. All bolts used on any portion of this work must be provided with washers under the nuts $\frac{1}{2}$ -inch thick, and of a diameter equal to the largest diameter of the nut.

17. Angle poles must have a slight batter or rake from the vertical at the top to allow for settling. This batter must on no account exceed twelve (12) inches. Care must be taken that the batter or rake is against the strain.

18. The insulator pins are to be fitted in the brackets.

19. The wire is to be stretched in accordance with instructions to be given by the inspecting officer.

20. All insulators must be perfectly clean when placed upon the insulator pins; and if the inspecting officer considers that the insulators require washing, the contractor must wash them before they are placed on the poles. Clean fresh water must always be used when washing is required.

21. All joints are to be of the pattern known as the "Britannia" joint. The ends of the line wire where joined are to be thoroughly cleaned with a file or emery cloth; the ends are then to be laid together and whipped round for two and a-half ($2\frac{1}{2}$) inches with No. 16 binding wire, which must also be thoroughly cleaned. The whole joint is then to be carefully soldered. Baker's soldering fluid, only, to be used as a flux. A supply will be provided by the Government.

22. The line wire is to be tied to the insulators with the binding wire supplied for that purpose and in the manner prescribed.

23. All material used in the construction of this work, or any part of it, must be of the best quality, and, together with the workmanship, is to be subject to the final approval or rejection of the Electrical Engineer, or any officer appointed by him to inspect the same.

Specifications, with Tender Forms attached, and all other information may be obtained on application at the Office of the Under Secretary and Superintendent of Telegraphs, Brisbane, and at the Telegraph Office, Rockhampton.

General Conditions.

1. The word "contractor" throughout these conditions and specifications shall mean all and any of the partners of a firm, or any single individual.

2. Payment will be made monthly, on the certificate of the Electrical Engineer, to the extent of seventy-five (75) per cent. on the value of the spindles completed and delivered at the Stores Branch of the Post and Telegraph Department, Brisbane. The total balance will be paid when the entire contract has been completed to the satisfaction of the Electrical Engineer.

3. Should the contractor fail to proceed in the execution of or to complete the work in the manner and at the rate of progress required by the Government, it shall be in the power of the Government, by a notice in writing to the contractor or his representative, or by a notice in the *Queensland Government Gazette*, to terminate the contract as far as relates to the work remaining to be done, and to enforce the penalty for non-fulfilment thereof, by forfeiting the deposit money and any other moneys due to the contractor, and the contractor shall have no claim on the Government for any preparation that he may have made, or for any work that has been done, nor for any material which may have been purchased by him for the purposes of this contract.

4. The contractor will have to provide, at his own cost, all labour, plant, tools, material, or whatever else may be required for the due performance of this contract.

5. Insulator spindles must be delivered at the Stores Branch of the Post and Telegraph Department, at the rate of two hundred and fifty (250) per week, the first delivery to be made in a period not exceeding three (3) weeks from the notification of the acceptance of the Tender.

6. A deposit of a sum equal to ten (10) per cent. of the total tender cost of the work must accompany each Tender (without which Tenders will be informal). Such deposit will be retained by the Government until the completion of the contract to the satisfaction of the Electrical Engineer.

7. The Electrical Engineer or his deputy shall at all times have access to the workshop where the insulator spindles are being manufactured.

8. In case the Electrical Engineer or his deputy is of opinion, at any time before the completion of each or any insulator spindle, or before delivery of each or any of them has been accepted, that any of the insulator spindles have been or are being manufactured unsoundly, or imperfectly, or not with proper material, or in any respect whatever not in accordance with the specification or drawing, or with instructions given by the Electrical Engineer or his deputy, either of these officers may give the contractor notice that such defective insulator spindles will not be accepted, and the contractor shall

have no claim against the Government for insulator spindles so rejected. Any spindles rejected will have to be removed by the contractor within one week from the notification of rejection.

9. A drawing of the insulator spindle, full size, will be supplied to the successful tenderer. The drawing can be examined at the office of the Electrical Engineer, Brisbane, or at the Telegraph Offices, Toowoomba, Ipswich, Maryborough, and Bundaberg, between the hours of 9 a.m. and 4 p.m. daily.

10. The Government reserve the right to alter the design of the insulator spindle in any matter of detail as may be found desirable, at any time before the contract is completed. Such alteration in detail to be paid for at a price to be mutually agreed upon between the Government and the contractor.

11. A copy of these conditions, together with the specification, signed by the contractor and duly witnessed, must accompany each Tender.

12. The decision of the Government Electrical Engineer will be final in all matters of dispute between the contractor and the Government in regard to this contract.

13. The Government does not bind itself to accept the lowest or any Tender.

Specification.

There will be ten thousand (10,000) insulator spindles, as per drawing.

The spindles and nuts to be of the exact dimensions shown upon the drawing, of the "Best Best" Staffordshire iron, well and neatly forged and perfectly screwed for the nut, with clean-cut, full threads to Whitworth's gauge. The nuts to be squared and so screwed that they will be interchangeable and will fit each or any spindle. Each nut to be provided with a round galvanised iron washer of 1½ inches in diameter and ⅛-inch metal.

The upper two (2) inches of each spindle to be jagged and a screw thread cast thereon in a chill mould of an alloy of the following proportions—viz., one-third (⅓) zinc, one-third (⅓) lead, and one-third (⅓) block tin. The moulds to be provided by the contractor, with a screw thread cut therein from which a thread shall be cast on to the jagged top of each of the spindles as shown in the drawing. This thread to be clean and free from blowholes and all other irregularities, and to screw easily and freely into any insulator of that class.

If necessary, the screw-threads on the head of the spindles will have to be dressed after the alloy is cast on the spindle. The spindles and nuts to be smoothly and evenly galvanised, but the threads of the screws must not be injured by the galvanising. When galvanising is completed the nuts must screw on and off easily.

The spindles must be finished in a neat and workmanlike manner, otherwise they will be rejected.

Specifications and any other information may be obtained on application at the office of the Under Secretary and Superintendent of Telegraphs, Brisbane. Specifications can also be obtained at the Telegraph Offices, Toowoomba, Ipswich, Maryborough, and Bundaberg.

N.B.—Each lot selected subject to payment of the value of improvements, if any.
The portions along Yeraman Creek consist of good red and brown soil; those along Cooyar Creek consist of fairly well-grassed country; those between Cooyar and Yeraman Creeks consist of dense vine scrub with broken belts of scrubby forest. Most of the portions are watered by Cooyar and Yeraman Creeks. They are situated from about six to thirty-two miles from Nanango, and from about thirty to fifty-five miles from Jondaryan Railway Station, and about sixty-five miles from Esk.

A PROCLAMATION.

By His Excellency the Right Honourable CHARLES WALLACE ALEXANDER NAPIER, Baron Lamington of Lamington, [L.S.] in the county of Lanark, in the Peerage of the United Kingdom, Knight Commander of the Most Distinguished Order of St. Michael and St. George, Governor and Commander-in-Chief of the Colony of Queensland and its Dependencies.
WHEREAS by an Order in Council made on the nineteenth day of May, 1897, I did, by and with the advice of the Executive Council, and on the recommendation of the Land Board, order that the operation of so much of the 43rd section of "The Crown Lands Act of 1884" as requires land to be actually surveyed and marked on the ground before it is proclaimed open for selection should be suspended with respect to the Country Land described in the Schedule hereto, and the Surveyor-General was, by the said Order in Council, required to divide the said land into lots and to indicate the position of such lots on proper maps or plans: And whereas the Surveyor-General has accordingly divided the said land into the lots specified in the said Schedule, and has indicated the position thereof on proper maps or plans: Now, therefore, in pursuance and execution of all powers and authorities in me vested under the provisions of "The Crown Lands Acts, 1884 to 1895," I, CHARLES WALLACE ALEXANDER NAPIER, Baron Lamington, the Governor aforesaid, by and with the advice of the Executive Council, do, by this my Proclamation, notify and declare that the said land specified in the said Schedule hereto, being situated in the HUGHENDEN LAND AGENT'S DISTRICT, shall be open for Selection as GRAZING FARMS, under the provisions of the said Acts, at the HUGHENDEN LAND OFFICE, on and after TUESDAY, the TWENTY-NINTH day of JUNE, 1897, at ELEVEN O'CLOCK A.M., at the annual rental specified in the said Schedule: And I do hereby, by and with the advice aforesaid, declare that the maximum area which may be selected by any one person in the said District shall be 20,000 acres.

a. These portions consist of open downs, brown soil, well grassed, with clumps of whitewood and bushes in places. There is a good waterhole in Portion 4 and a dam in Portion 7; the other portions are unwatered. They are situated about twenty-five miles east from Olio Tank, on the Winton and Hughenden main road, and the north-eastern part about fifteen miles westerly from Tangorin. Artesian water has been obtained close to the northern part of the area on Barenja Lease and on Rockwood, at depths of 2,200 and 2,700 feet, respectively, but it is probable that further south it cannot be obtained under about 4,000 feet.

b. These portions consist of very open brown soil downs. Portion 1 is watered by the Thomson River; the other portions are unwatered. Artesian water has been tapped on Westlands at depths of 2,980 and 3,480 feet. Distant from Longreach by main stock route, about seventy-five miles.

HORACE TOZER.

THE SECRETARY OF STATE FOR WAR to THE GOVERNOR OF QUEENSLAND.

War Office, 7th April, 1897.

MY LORD,—I am directed by the Marquis of Lansdowne to transmit herewith for your information a copy of the Army (Annual) Act, 1897.

I have, &c., ARTHUR L. HALIBURTON.

[Enclosure.]

60 VICT., CHAPTER 3.

A.D. 1897.

AN ACT TO PROVIDE, DURING TWELVE MONTHS, FOR THE DISCIPLINE AND REGULATION OF THE ARMY. [29th March, 1897.]

WHEREAS the raising or keeping of a standing army within the United Kingdom of Great Britain and Ireland in time of peace, unless it be with the consent of Parliament, is against law :

And whereas it is adjudged necessary by Her Majesty and this present Parliament, that a body of forces should be continued for the safety of the United Kingdom and the defence of the possessions of Her Majesty's Crown, and that the whole number of such forces should consist of one hundred and fifty-eight thousand seven hundred and seventy-four, including those to be employed at the depôts in the United Kingdom of Great Britain and Ireland for the training of recruits for service at home and abroad, but exclusive of the numbers actually serving within Her Majesty's Indian possessions :

And whereas it is also judged necessary for the safety of the United Kingdom, and the defence of the possessions of this realm, that a body of Royal Marine forces should be employed in Her Majesty's fleet and naval service, under the direction of the Lord High Admiral of the United Kingdom, or the Commissioners for executing the office of Lord High Admiral aforesaid :

And whereas the said marine forces may frequently be quartered or be on shore, or sent to do duty or be on board transport ships or vessels, merchant ships or vessels, or other ships or vessels, or they may be under other circumstances in which they will not be subject to the laws relating to the government of Her Majesty's forces by sea :

And whereas no man can be forejudged of life or limb, or subjected in time of peace to any kind of punishment within this realm by martial law, or in any other manner than by the judgment of his peers and according to the known and established laws of this realm ; yet nevertheless it being requisite, for the retaining all the before-mentioned forces, and other persons subject to military law, in their duty, that an exact discipline be observed, and that persons belonging to the said forces who mutiny or stir up sedition, or desert Her Majesty's service, or are guilty of crimes and offences to the prejudice of good order and military discipline, be brought to a more exemplary and speedy punishment than the usual forms of the law will allow :

And whereas the Army Act will expire in the year one thousand eight hundred and ninety-seven on the following days :

- (a) In the United Kingdom, the Channel Islands, and the Isle of Man, on the thirtieth day of April ; and
- (b) Elsewhere in Europe, inclusive of Malta, also in the West Indies and America, on the thirty-first day of July ; and
- (c) Elsewhere, whether within or without Her Majesty's dominions, on the thirty-first day of December :

Be it therefore enacted by the Queen's most Excellent Majesty, by and with the advice and consent of the Lords Spiritual and Temporal, and Commons, in this present Parliament assembled, and by the authority of the same as follows :—

1. This Act may be cited as the Army (Annual) Act, 1897.

2.—(1.) The Army Act shall be and remain in force during the periods herein-after mentioned, and no longer, unless otherwise provided by Parliament ; that is to say,

- (a) Within the United Kingdom, the Channel Islands, and the Isle of Man, from the thirtieth day of April one thousand eight hundred and ninety-seven to the thirtieth day of April one thousand eight hundred and ninety-eight, both inclusive ; and
- (b) Elsewhere in Europe, inclusive of Malta, also in the West Indies and America, from the thirty-first day of July one thousand eight hundred and ninety-seven to the thirty-first day of July one thousand eight hundred and ninety-eight, both inclusive ; and
- (c) Elsewhere, whether within or without Her Majesty's dominions, from the thirty-first day of December one thousand eight hundred and ninety-seven to the thirty-first day of December one thousand eight hundred and ninety-eight, both inclusive ;

and the day from which the Army Act is continued in any place by this Act is in relation to that place referred to in this Act as the commencement of this Act.

(2.) The Army Act, while in force, shall apply to persons subject to military law, whether within or without Her Majesty's dominions.

(3.) A person subject to military law shall not be exempted from the provisions of the Army Act by reason only that the number of the forces for the time being in the service of Her Majesty, exclusive of the marine forces, is either greater or less than the number herein-before mentioned.

3. There shall be paid to the keeper of a victualling house for the accommodation provided by him in pursuance of the Army Act the prices specified in the schedule to this Act.

2. The word "Contractor" throughout these conditions and specification shall mean all and any of the partners of a firm, or any single individual.

3. Any surplus material after the completion of the contract must be delivered by the contractor, free of charge, at Hendon Railway Telegraph Office.

4. The whole of the works included in this contract must be completed and handed over to the Government within four (4) weeks of the notification of the acceptance of the Tender; and should the completion of the works be delayed beyond that date, the contractor shall forfeit and pay to the Government, as and for liquidated and ascertained damages, the sum of five pounds sterling for every week or part of a week that shall elapse after such date until their completion, and the amount of such damages may be deducted by the Government from any money payable to the contractor under this contract.

5. Payment will be made monthly to the extent of seventy-five (75) per cent. on the value of the work reported to have been completed by the officer appointed to inspect the same; but, notwithstanding such report and payment on account, the Under Secretary and Superintendent of Telegraphs, or other officer appointed by him in that behalf, shall have full power at any time afterwards, before final payment shall be made, of rejecting and condemning any of the work or materials in respect of which such report and payments may have been made. Certificates must be produced from the Municipal Council of Allora, the Chairman of the Divisional Board through whose Division the line passes or has been taken, and from property owners if through or near the boundaries of private lands, that no claims are made by them under Clause 7, before final payment will be made. The total balance will be paid when the entire contract shall have been completed and all claims settled to the satisfaction of the Government.

6. The Government reserves to itself the right to make use of the line for the transmission of messages prior to final completion. Such use of the line not to prejudice in any way the

power to subsequently reject or condemn any portion of the work or materials.

7. The contractor may avail himself of the facilities afforded by "The Post and Telegraph Act, 1891," for obtaining materials, on signing a bond indemnifying the Government against any claims for compensation arising from the action of the contractor: Provided always that it shall be lawful for the Under Secretary and Superintendent of Telegraphs, from moneys due to the contractor, if not otherwise settled, to satisfy any such claim he may see fit.

8. No action or suit shall be brought or maintained by the contractor or the Under Secretary and Superintendent of Telegraphs against the other of them to recover any money for or in respect of or arising out of this contract, or any breach thereof by the contractor or the Under Secretary and Superintendent of Telegraphs, or for or in respect of any other matter or thing arising out of this contract, unless and until the contractor or the Under Secretary and Superintendent of Telegraphs has obtained a certificate of the inspecting officer for the amount sued for, and then only for the amount so certified.

9. The contractor will have to provide, at his own cost, all labour, plant, tools, material (other than that mentioned in Clause 3 of these conditions), or whatever else may be required for the due performance of this contract.

10. The contractor will be responsible for all claims for compensation for damage to fences or other property caused by the erection of the line, also for damage so caused to roads; and if such claims are not defrayed, the Under Secretary and Superintendent of Telegraphs is authorised to pay the same from any moneys due to the contractor.

11. Should the contractor fail to proceed in the execution of, or to complete, the work in the manner and at the rate of progress required by the Postmaster-General, it shall be lawful for the Postmaster-General, by a notice in writing delivered to the contractor or his representative, or by a notice in the *Queensland Government Gazette*, to terminate the contract, as far as relates to the work remaining to be done, and to enforce the penalties for the non-fulfilment of the contract; and all sums of money which may be due to the contractor, together with all plant, materials, and implements in his possession on the ground, and all sums of money, whether named in the bond to be entered into by the contractor and his sureties, or otherwise, as penalties for the non-fulfilment of the contract, shall be forfeited to the Government, and the amount shall be considered as ascertained damages for breach of contract.

12. A deposit of a sum equal to ten (10) per cent. of the total tender cost of the whole work must accompany each Tender (without which Tenders will be informal), also a memorandum signed by the party tendering, and two responsible persons as sureties, agreeing to be answerable for the due performance of the contract within the time stipulated, in the event of the Tender being accepted, and undertaking in that event that they will severally execute and deliver at the Office of the Under Secretary and Superintendent of Telegraphs, in Brisbane, within ten (10) days from the date of the notification of the acceptance of the Tender, a bond to Her Majesty in a sum equal to twenty (20) per cent. on the amount of the Tender.

13. All workmen and employees engaged upon the works by the contractor shall be paid their full wages in lawful money, at least once in every month.

14. Such payments shall be made in some building or place convenient to the site of the works, but in no case shall such payments be made at any public-house or other place where liquors or refreshments are sold.

15. The contractor shall not sell or dispose of, or be in any way interested in the sale or disposal of, alcoholic liquors or other articles of consumption, to the workmen or employees engaged upon the works.

16. If the contractor sublets any portion of the works, all workmen and employees engaged thereon shall be paid by the sub-contractor at the times and under the conditions herein specified, but in the event of the sub-contractor failing to make any such payments then the contractor shall be liable to make the same.

17. Before the payment of any money to the contractor, the Postmaster-General may require from him satisfactory evidence that all the workmen and employees then and theretofore engaged upon the works have been paid their wages and other lawful claims of every kind in full, in lawful money, and to the latest date at which such wages and claims are due; and the Postmaster-General may withhold the payment of all moneys due or that may become due to the contractor, until he is satisfied that such wages and claims have been paid.

18. If the contractor fails or omits to pay to any workmen or employees engaged upon the works their full wages in cash once at least in every month, the Postmaster-General may, as often as the same shall happen, upon complaint of such failure or omission made, and upon evidence satisfactory to him of an order or judgment of a Court of Petty Sessions, or of any other court of competent jurisdiction, pay the amount

mentioned in such order to such workmen or employees, and deduct the amounts so paid from any sum or sums which may be due or become due to the contractor.

19. Although the Under Secretary and Superintendent of Telegraphs or his officers may furnish any information in connection with this contract, any such information shall not relieve the contractor from any risk or from the fulfilment of his contract, nor will the fact of any such information being given entitle the contractor to make any claim for compensation.

20. The inspecting officer shall have the power to order the dismissal or removal of any foreman or workman employed by the contractor upon giving written notice to the contractor of his intention to do so; and if such foreman or workman is retained by the contractor after such notice has been given, then the inspecting officer shall have the power to delay the signing of any voucher or certificate for payment for any work done until such order has been obeyed.

21. The Government reserve the right to alter the Specification in any matters of detail if any such alterations should be found necessary; the prices to be paid for any such alterations to be mutually agreed upon by the Government and the contractor before the work is carried out. No extras will be allowed unless the prices have been arranged previous to the work being carried out.

22. The decision of the Government Electrical Engineer will be final in all matters of dispute between the contractors and the Government in regard to this contract.

23. The contractor must shift camp for the inspecting officer as required.

24. The Government does not bind itself to accept the lowest or any Tender.

Specification.

1. The clearing, where necessary, to be carried out in accordance with and in the manner specified in Clauses 2, 3, 4, and 5. Clearing is only to be done in such places as the inspecting officer may direct.

2. All trees, dead timber, and underwood standing within forty (40) feet on each side of the line to be felled; and all fallen timber, whether felled by the contractor or otherwise, within a radius of twenty (20) feet from each pole or strut, also for six (6) feet on each side of the fence or course of same, to be cleared away.

3. Any branches overhanging from trees beyond the distance mentioned, which, in the judgment of the inspecting officer, might endanger the line, to be removed. Every care must be taken not to damage fencing or any other property of any kind.

4. Trees outside the distance mentioned, which, in the judgment of the inspecting officer, might endanger the line, are to be felled.

5. All existing cleared roads which may become blocked by fallen timber must be cleared by the removal of the timber to the original width of such roadway. In cases where tracks may become blocked, all fallen timber must be removed, leaving a clear space of not less than twenty (20) feet in width, following the course of such track. If any overhanging trees, outside the boundaries of the existing line, should be felled, Clauses 2 and 5 shall apply to the felling of such trees, as far as regards the clearing away of all fallen timber.

6. Poles to be straight saplings of the best description of narrow-leaved ironbark or other approved timber (the approval of any timber will rest with the Government), with the bark removed, not less than six (6) inches in the least diameter, clear of sapwood, at the small end, and not less than thirty-two (32) inches in circumference at five (5) feet from the butt, and not less than twenty-seven (27) feet in length; to be carefully and thoroughly charred from the butt upwards to one (1) foot above the ground, the charred portion to be well coated with hot coal tar. Extra-length poles to be three (3) inches greater in circumference at five (5) feet from the butt for each additional five (5) feet in length or fraction of five (5) feet.

7. The top of each pole to be sawn off with a bevel of one (1) in one (1) on each side, so as to leave an equal slope on each side of the pole. Over the top thus formed a galvanised iron roof is to be neatly nailed to the pole with four (4) two (2) inch clout nails, two nails on each side. The iron roof thus formed must project beyond the poles on all sides about two (2) inches.

8. Brackets to be fastened to the poles with three (3) inch coach screws; each pole shall have four (4) brackets fitted thereto, two (2) on each side of the pole. The sapwood must always be cut away to allow the base of the bracket to fit close to the pole.

The top bracket must be fixed nine (9) inches from the top of the pole, and on the right-hand side looking to the "Up" station (Brisbane side); any further brackets are to be placed alternately on opposite sides of the poles, and spaced seven (7) inches apart. They must not be fixed opposite to each other (in the same horizontal plane), but carefully spaced as instructed above. At every angle where, in the event of a wire leaving an insulator, there is the possibility of an accident, however slight,

an iron insulator pin must be used, and the wire fastened on the inside of the insulator. Brackets must always be at right angles to the line of wires.

9. Lightning conductors to be of No. 8-gauge galvanised iron wire, to be stretched straight from the top to the butt of each pole, and to be secured thereto with fourteen (14) staples of galvanised iron wire one and a-half (1½) inches in length. Staples bent in driving must be drawn and replaced by straight ones. The top of the conductor to be twisted once round a three (3) inch coach screw driven four (4) inches below the top of the pole, and then bent so that it will project not less than six (6) inches above the iron roof on the top of the pole; the other end of the conductor to be bent under the butt of the pole. If the poles exceed the specified length, the lightning conductors shall be proportionately longer, and an additional staple shall be driven for every two (2) feet additional length. Where poles are alongside roads, the staples to be driven at every foot from the ground to a height of eight (8) feet. Lightning conductors to be affixed to the poles midway between the brackets. Clauses 7, 8, and 9 shall apply to the fitting of roofs, brackets, and lightning conductors to any old poles which may be considered sound enough to remain on the line.

10. The poles to be not more than eighty-eight (88) yards apart, unless specially directed; to be sunk five (5) feet in the ground, placed in a perpendicular position, and well rammed with rubble and earth. Extra-length poles to be sunk any extra depth in ground that the inspecting officer may direct.

11. At angles and other places where required, struts are to be supplied and fitted. Struts are to be of approved timber (approval rests with the Government); to be about twenty-one (21) feet three (3) inches in length, sawn off square at the butt; to be not less than six (6) inches, clear of sapwood, in the least diameter at the small end, and not less than twenty-four (24) inches in circumference at the butt. Struts should not weaken the pole; therefore as little as possible of the timber of the pole inside the sapwood should be cut away at the joint. The small end of the strut is to be carefully and neatly scarfed to fit the pole at seventeen (17) feet from the ground level for a twenty-seven (27) foot pole. The joint must be neat and well fitting. A one-half (½) inch bolt is to be used to fasten the head of the strut to the pole. The inspecting officer will give instructions as to the angle at which the strut is to be placed against the pole.

12. Where the inspecting officer so directs, a block is to be securely fitted to the foot of the strut. The ground must be undercut to take the strut block, so that any pull may be against unmade ground. In the event of the inspecting officer so directing, a base block must also be fitted to such poles.

13. Dimensions of base blocks for these purposes to be three (3) feet in length by eight (8) inches in diameter, clear of sapwood. The block must be thoroughly charred before it is bolted to the pole. Any loose charcoal must be scraped off both strut, pole, and block before being bolted together. Blocks to be bolted to either struts or poles with half (½) inch bolts. Struts must be not less than three (3) feet in the ground.

14. Angle poles must have a slight batter or rake from the vertical at the top to allow for settling. This batter must on no account exceed twelve (12) inches. Care must be taken that the batter or rake is against the strain.

Clauses 11, 12, 13, and 14 shall apply to strutting of any old poles which may be considered sound enough to remain on the line.

15. The insulator pins are to be fitted in the brackets.

16. The wire is to be stretched in accordance with instructions to be given by the inspecting officer.

17. All insulators must be perfectly clean when placed upon the insulator pins; and if the inspecting officer considers that the insulators require washing, the contractor must wash them before they are placed on the poles. Clean fresh water must always be used when washing is required.

18. All joints are to be of the pattern known as the "Britannia" joint. The ends of the line wire where joined are to be thoroughly cleaned with a file or emery cloth; the ends are then to be laid together and whipped round for two and a-half (2½) inches with No. 16 binding wire, which must also be thoroughly cleaned. The whole joint is then to be carefully soldered. Baker's soldering fluid, only, to be used as a flux. A supply will be provided by the Government.

19. The line wire is to be tied to the insulators with the binding wire supplied for that purpose and in the manner prescribed.

20. All material used in the construction of this work, or any part of it, must be of the best quality, and, together with the workmanship, is to be subject to the final approval or rejection of the Electrical Engineer, or any officer appointed by him to inspect the same.

Any further information may be obtained on application at the Office of the Under Secretary and Superintendent of Telegraphs, Brisbane.

Repeal.

Clause 10 of By-law 12, published in the *Government Gazette* dated 28th March, 1896, is hereby repealed, and the following clause is substituted therefor :—

All fees for depasturing must be paid quarterly in advance, namely, on or before the first day of January, first day of April, first day of July, and first day of October. If any stock be placed on the reserves between those dates, the fee or fees for the then current quarter must be paid. Notice, however, in writing shall be given to the herdsman by every such carrier or traveller of his intention to keep his stock on the reserves for any time after the expiration of seven days as aforesaid, and without such notice and payment all such stock shall be deemed trespassing and liable to be impounded. The herdsman shall prepare and forward to the Council twice in every year—that is to say, on the thirtieth day of June and the thirty-first day of December—a detailed statement of all moneys received by him in respect of this By-law, and of all cattle and stock of every kind depastured on the reserves, together with the name, residence, and occupation of the person owning or claiming to own any such stock or cattle, and shall also render a monthly report to the Council of all payments made to him in pursuance of this By-law.

VOL. LXVII.]

SATURDAY, 22ND MAY, 1897.

[No. 125.]

The Treasury, Brisbane, 20th May, 1897.

SUPPLIES FOR PUBLIC SERVICE, 1898 AND 1899.

TENDERS will be received at this Office until Noon of THURSDAY, 10th June, 1897, from persons willing to contract for the Supply for the Public Service of Articles, as per Schedules enumerated below, for two years from the first day of January, 1898, in such quantities as may from time to time be required by the Colonial Storekeeper in Brisbane, from whom printed forms of Tender and all necessary information can be obtained.

The Schedules consist of—

- (1) Stationery; (2) Envelopes; (3) Paper; (5) Drapery; (6) Q.G. Blankets; (7) Grey calico; (8) Cloth; (9) Hats and ribbons; (10) Helmets and caps; (11) Bedding; (12) Crockery and tumblers; (13) Brushware; (14) Ironmongery; (15) Saddlers' ironmongery; (16) Leather; (17) Grindery; (18) Ship chandlery; (19) Paints, oils, &c.; (20) Canvas, cord, &c.; (21) Flags; (22) Medicines and chemicals; (23) Timber.

GENERAL CONDITIONS.

1. The envelope containing the Tender must be endorsed "*Tender for Supplies, 1898 and 1899.*"
2. The lowest or any Tender will not necessarily be accepted.
3. Attached to each Tender there must be a memorandum signed by the party tendering, and two responsible persons as sureties, agreeing to be answerable for the due performance of the contract, in the event of the Tender being accepted, and undertaking, in such case, that they will severally execute and deliver, at the Office of the Colonial Storekeeper, in Brisbane, within fourteen days from the notification of acceptance of the Tender, a bond to Her Majesty for securing such performance, computed at ten per centum on the estimated value of the Tender.
4. It will be optional for persons to Tender for any one or more of the classes into which the supplies are divided, but no Tender will be received for only a portion of the articles enumerated in any one class.
5. The Tenders must state the price at which each article tendered for is to be supplied.
6. Customs duties, and the value of all packages, are to be included in the prices named.
7. A sample of such of the articles to be tendered for as are marked in the Schedules with an asterisk may be seen at the Colonial Stores; where no samples are shown, it is to be understood that the articles shall be the best of their several kinds. The sample may in some respects be approximate, and is to be read in view of the fuller particulars given in the Schedules.
8. It must be distinctly understood that, where special brands of goods or makers' names are used in the Schedules, only goods fulfilling those conditions will be accepted. In other cases, articles equal in every respect to the sealed samples may be supplied.
9. In the case of those Schedules where no quantities are expressed the contractor will be bound to furnish as much or as little of the articles tendered for as may be required. Some of the items may not be required at all.
10. Where weight or measurement is expressed, and the articles tendered fall short of the stipulation, the Colonial Storekeeper may, should he think fit to accept the articles, make a rateable reduction from the price, or he may accept such portion as fulfil the terms of the contract, and reject the remainder.
11. In the case of articles which, upon examination, *after delivery*, are found defective, the Colonial Storekeeper may call upon the contractor to replace same with the proper article, and may refuse payment or certificate for payment until due substitution is made.
12. When goods of any one kind are delivered in large quantities they shall be in original packages, but no claim will be allowed for such packages.
13. In cases of urgency the Colonial Storekeeper may purchase any of the articles enumerated from others than the contractor.
14. In the event of any articles not included in the Schedules being purchased from a contractor, a discount of two and a-half per cent. will be deducted on payment for same.
15. In the event of any failure or delay on the part of a contractor in supplying articles as required, they may after forty-eight hours' default be procured by the Colonial Storekeeper at the risk and expense of the contractor, and the excess of cost, if any, shall be deducted from any moneys payable to the contractor.
16. In the event of a difference of opinion between a contractor and the Colonial Storekeeper as to the quality of any articles supplied, the decision of the Minister shall be final and binding upon the contractor.
17. It is to be distinctly understood that the conditions of these contracts are not to be considered as infringed by the Government should they obtain similar supplies under other departmental contracts.
18. It shall be in the power of the Government to terminate a contract forthwith on the report of the Colonial Storekeeper that persistent irregularity exists in the quality of articles tendered, or that unnecessary delay in delivery or in replacing them when required occurs; the defaulting contractor shall, however, retain the privilege of delivering, as required, articles bearing a distinctive Government mark or brand to the extent of the shipments, not exceeding the stipulated quantity, he may then have *en route*.

T. M. KING, Under Secretary.

(The Engineer Students to be trained for service afloat as Engineer Officers.)

(The Students in Naval Construction to be trained with a view to their joining the Royal Corps of Naval Constructors.)

Vacancies open to public competition principally; a few to be filled by nominated Candidates.

1. Vacancies for Appointments as Engineer Students in Her Majesty's Navy will be filled principally by means of competitive Examinations open to Candidates as understated, being of the prescribed age and of good moral character, but their Lordships will reserve to themselves the right to nominate a few at each entry who will be appointed on passing the examination specified in paragraph 11.

A Candidate must be the son, either (1) of natural born British Subjects, or (2) of Parents naturalised in the United Kingdom; and he must be of pure European descent. If any doubt arises on the latter point, the burden of clear proof that he is qualified, will rest upon the Candidate himself.

The Candidates to be nominated will be selected by the Board of Admiralty from sons of officers of the Navy, Army, or Royal Marines who have been killed in action or who have been lost at sea on active service, or killed on duty, or who have died of wounds, received in action or injuries received on duty within six months from the date of such action or injury, or sons of officers of the Navy or Royal Marines who have performed long and meritorious service. The number to be so nominated will not exceed one-fifth of the total number of Engineer Students to be entered. Except as provided in paragraph 11, the Candidates will be subject to the same Regulations as the Candidates for appointment by open competition.*

Three Engineer Studentships will be given annually to sons of gentlemen in the Colonies on the recommendation of the Secretary of State for the Colonies, provided they pass the required Examination. These candidates will be subject to precisely the same regulations as herein laid down for nominated service candidates.†

2. The number of Appointments to be made in each year will be fixed by their Lordships.

Time for sending in Applications.

3. The list of Candidates for the Appointments by open competition will be kept at the office of the Civil Service Commissioners. All applications for the forms to be filled up by persons who wish to compete must be sent to the *Secretary, Civil Service Commission, London, S.W.*, on or after the first of January in each year, and care must be taken that the Forms when filled up reach the *Civil Service Commissioners* on or before the *15th March following*, as no notice will be taken of Forms received after that date. The List of Nominated Candidates will be kept at the Admiralty.

4. Candidates must not be less than Fourteen nor more than Seventeen Years of age on the first day of May in the year in which they are examined.

Age and character, evidence of.

5. Evidence of age and character will not be required before the examination, but Candidates successful in it will not be eligible for appointment unless they satisfy the Civil Service Commissioners on these points.

* Applications for nominations must be made so as to arrive at the Admiralty before the first of February in each year, and should be addressed to the Secretary of the Admiralty if the Candidate is the son of an officer of the Navy or Marines; to the Military Secretary, Horse Guards, if the Candidate is a son of an officer of the Army; and to the Military Secretary, India Office, if the Candidate is the son of an officer of the Indian Army.

Medical Examination, time and place.—Re-vaccination.

6. The Medical Examination of the Successful Candidates will be held under the authority of their Lordships, as soon as possible after the result of the Educational Examination is made known. No candidate will be entered as an Engineer Student unless he is pronounced to be physically fit. Candidates in or near London will be medically examined by the Medical Director-General of the Navy at the Admiralty. Those residing near one of Her Majesty's Dockyards, or one of the First Reserve Ships, or Drill Ships of the Royal Naval Reserve, or the Flagship at Queenstown, will be examined by the Medical Officers attached thereto. The Medical Examinations will be conducted in all respects in strict accordance with the Instructions for the examination of persons for admission into the Naval Service. The Colonial Candidates who reside abroad will be medically examined at the Naval Station nearest to where they reside. All candidates at the time of their Medical Examination must produce Certificates to the satisfaction of the examining Officers that they have been re-vaccinated, or they must be re-vaccinated before they can be considered eligible for entry as Engineer Students in H.M. Navy.

Educational Examination, time and place.

7. The Educational Examination will be held by the Civil Service Commissioners in London, Liverpool, Portsmouth, Devonport, Birmingham, Manchester, Newcastle-on-Tyne, Edinburgh, Dublin, and as can be most suitably arranged for the Colonial Candidates who reside abroad; and will take place in the month of April of each year. The exact date may be ascertained by application to the Secretary, Civil Service Commission, on or after the first of January in each year. The examination of the Colonial Candidates who reside abroad will be conducted by the Civil Service Commissioners and under the superintendence of the Commander-in-Chief of the nearest Naval Station. Suitable arrangements will be made for the Candidates to receive the Examination papers; and the worked papers of the Candidates will be sent to London as soon as possible to enable the marks to be assigned by the Civil Service Commissioners.

The Students in Naval Construction, on appointment, must join with their Parents or Guardians in a Bond for £500 to enter, if required, into Her Majesty's Service as Assistant Constructors, if at the expiration of their training they should obtain Certificates of good conduct and efficiency for entry in that capacity. They will continue to be under Naval discipline until their entry as Assistant Constructors. (See paragraphs 45 and 47.)

A form of the required Bond is set out in the Schedule hereto.

An Assistant Constructor will not be permitted to leave the service until seven years have expired after the completion of his Term at the Royal Naval College at Greenwich, unless he shall pay the sum of £500. This payment is for the purpose of defraying the charges incurred by the Public for his education.

15. Students in Naval Construction will complete five years' service at Devonport in the Training School for Engineer Students, and will be subject to the same conditions as to fees, pay, uniform, and other details as may be prescribed from time to time for Engineer students. respect to whom the annual payment will be £25 only. Their Lordships also reserve the power to further reduce this latter sum in the case of sons of Officers *killed or drowned, or who have otherwise lost their lives on Service*. In making their selection, my Lords will have regard solely to the pecuniary circumstances of the Parents or Guardians of the Students.

Payments to be made half-yearly in advance.

17. The payments are to be made half-yearly, in advance, to the Cashier of H.M. Dockyard at Devonport; the first payment is to be made on or before the 1st of July, the date of entry of the Student, and the subsequent payments on or before the 1st January and 1st July during the remainder of the Student's training. Should a Student leave from any cause, or be dismissed from the Service, not any portion of the payments that have been made in his behalf will be refunded.

Clothing, Washing, Necessaries, Board, Lodging, Medical Attendance.

18. The Parents or Guardians of the Students will also be required to provide the Uniform (*see* par. 52) or other Clothing, Washing, and Necessaries of each Student. Board and Lodging and Medical Attendance will be provided by the Admiralty. The Students will be required to reside in the Training School at Keyham.

Pay.

19. The weekly pay of Students during their training will be as follows, provided they are well reported on by the Officers:—

First year	One shilling	} a week.
Second „	Two shillings	
Third „	Three „	
Fourth „	Five „	
Fifth „	Eight „	

Leave.

20. Six weeks' leave (thirty-six working days) on full pay will be granted each year to all Students whose conduct and progress have been satisfactory. Those who cannot be so reported will be granted leave for smaller periods, which will be at the discretion of the Admiral Superintendent. This leave is to be taken during the School Vacations, viz., four weeks at Midsummer and two weeks at Christmas.

Health Certificate to be furnished.

21. Every Engineer Student on first joining, or, on returning to the "Training School" after the vacations, will be required to produce a health certificate—signed by his Parent or Guardian, not earlier than the day before his return to the "Training School"—to the effect that, so far as is known to his Parent or Guardian, he has not for at least three weeks immediately preceding his return been exposed to any infectious disease, or entered any house where such disease has existed. A certificate, drawn up in the necessary Form, will be sent to each Parent, and failure on the part of the Engineer Student to produce this certificate, duly filled up and signed, on his return to the "Training School," will entail his being isolated until the certificate is received.

Checking of Pay—Discharge if Unfit.

22. The Students are not to be checked pay while on leave, nor when hurt on duty. When sick or sent to Hospital from causes beyond their own control, they are not to be checked of their pay until they have been absent for six months in the aggregate during any period of twelve months; at the expiration of this time a special report is to be made to their Lordships. When sick, or sent to Hospital from causes within their own control, they are to be checked of their pay. Students pronounced at the end of twelve months' absence on account of sickness or hurt to be permanently unfit or unlikely to be capable of entering Her Majesty's Service as Assistant Engineers, or as Assistant Constructors, will be discharged. Should any Student in the course of his training develop physical unfitness for the Service, he will be discharged.

Supervision.

23. The Students will be under the supervision of the Superintendent of the Dockyard and a Staff of Officers, and subject to such rules and regulations as their Lordships may deem necessary.

Employment and Instruction of Students.

24. Students will receive practical training in the Engineering Workshops, will spend a portion of their time in the Drawing Office, and will receive instruction in Iron Shipbuilding at H.M. Dockyard at Devonport. While the Engineer Students are being instructed in Iron Shipbuilding they are to be under the direction of the Chief Constructor. They will attend the Engineer Students' School in the Dockyard for such periods, and for the study of such theoretical subjects, as may from time to time be determined on. Means will be afforded them of acquiring the groundwork of the knowledge required by a Naval Engineer respecting the working of Marine Engines and boilers, including those repairs which can be carried out afloat, the practical use of the various Instruments used in the Engine-room, also of the construction and working of Electric Light, Torpedo and Gun Machinery, and of becoming generally acquainted with the duties of a Naval Engineer.

Discharge or suspension of appointment for unsatisfactory conduct.

25. The cases of those Students who fail to make satisfactory progress and give no hope of becoming efficient officers, or are guilty of persistent misconduct, will be considered annually with reference to the discharge of such Students from the Service.

In the event of serious misconduct on the part of Senior Engineer Students, which may not be of such a nature as to necessitate their dismissal, their appointments will be withheld as may be considered necessary by their Lordships from three to nine months after their passing for the rank of Probationary Assistant Engineer on the completion of their five years' period of training. In such cases they will be employed in Workshops only, and whilst thus under observation their conduct will be reported to the Admiralty quarterly.

Appointments as Probationary Assistant Engineer will not be granted to any Students of four years' service whose character and conduct are considered by their Lordships to have been unsatisfactory during the preceding twelve months.

Those failing to attain this standard will be liable to dismissal. NOTICE TO MARINERS.

THE following Notice to Mariners is published for general information.

ROBERT PHILP.

HURRICANES, QUEENSLAND COAST.

Tropical hurricanes on the coast of Queensland may be expected during the summer months, viz., December, January, February, March, and early part of April, and have occurred between the dates 14th December to 14th April inclusive.

These storms appear to originate between latitudes 8° to 12° S. and between the meridians of 155° E. and 170° W.

On reaching the Queensland coast, they may strike the land at any point between latitudes 14° and 26° (that is, between Cape Melville and Wide Bay); for the last eight years the full force, or centre of the storm, has passed about 30 miles to the southward of Cairns.

The names of the places at which they are most frequently experienced are Cardwell, Townsville, Bowen, the Northumberland Islands, and the neighbourhood of Sandy Cape.

To the southward of lat. 26° S. these storms break up into heavy gales.

2. If, during the summer months and the early part of April, a heavy swell sets in from N.E., and there is little or no wind at the time, bad weather is certain, for the sea is always in advance of a cyclone.

With the glass steadily falling, heavy rains and murky sky, winds between S.S.E. and E., a cyclone may be expected.

These storms may extend some distance inland, but their centres do not often pass the coast ranges, which appear to repel them, and they usually emerge from the coast between Broadsound and Cape Moreton.

3. If the barometer is high over a considerable portion of the coast, the storm will recurve some distance off the land, and the wind will be from S.E. to S.

4. If, on the contrary, the barometer is low in front of the storm, it will blow home on the land as far as the coast range, and cause floods; when this happens, the first of the gale will be southerly, the latter part northerly.

5. The bearing of the storm centre will be at right angles to the waves line; thus, on a fine day, if there is a heavier sea than usual breaking on the beach, and it is coming from the N.E., if the direction remains the same or nearly so, and the barometer is not above 30 inches, the gale will blow home on the land, and the first signs of bad weather will not precede the gale by more than 12 hours; but if the direction of the swell changes to the eastward, the storm is recurving, and the body of it will not reach the land.

When the swell is from the east, the storm centre is east; when there is any southing in the line of swell, the storm has passed.

6. No matter how threatening the weather signs may be, if the line of swell comes first from the southward there will only be an ordinary south polar storm with a low temperature.

7. TO AVOID THE STORMS.—By applying Buys' Ballot's law for the Southern hemisphere, namely, "Standing with your back to the wind the lowest barometer is on your right hand," and hence the storm centre, valuable information is attained.

Should the winds be from S.S.E. to E. the barometer steadily falling, and a heavy murky sky, the navigator may be certain the storm is approaching him, and should endeavour to make northwards, so as to locate himself in the northern or fine weather half of the disturbance, where the winds will be from N.W. to W. Steamers bound north and outside the Barrier Reef, on observing the barometer falling and signs of bad weather should steam S.S.E. and let the storm pass inside them. Steamers coming south should in a similar case stop for a few hours and let the storm pass ahead of them.

Sailing vessels should not hesitate a moment, but run for the nearest shelter; but should they be coming south and find themselves on the east side of the storm with northerly wind they should heave to, and on no pretence attempt to run.

If anchored under the lee of an island, and the wind does not shift, the centre of the storm will pass over them, and the fiercest part of the gale will be experienced; after the centre has passed they will have a dead lee shore.

Therefore, when the wind lulls, which it usually does, slip and get away at once, if possible to do so.

There will be an additional bracket on each pole from the Railway Station, Rockhampton. - (11) Price, per strut, for strutting (to include providing and fitting all struts—either on existing or on new line—fixing all bolts, fitting, and all other work in connection therewith). This price will include providing and fitting struts for

extra poles. Strutting is to be done only at such angles as the inspecting officer directs. The number of struts cannot be stated. There will be about 6 on the new line between the Junction, near Nankin Creek, and Broadmount... ..

- (13) Price, per block, for stay blocks, to be used at such angles as the inspecting officer may direct. There will be about 93 poles to be fitted with stay blocks between the Junction, near Nankin Creek, and Broadmount

The Government do not guarantee that the above quantities or distances are correct. They are given to enable Tenderers to arrive at an approximate total tender cost of the whole work. If there should be a greater or lesser number of any of the above items, or if the distances should prove to be incorrect, the contractor will be paid for work done at his schedule price, and he will have no claim against the Government in either case for any misstatement of quantities or distances.

This contract will include the stretching of an additional wire from Rockhampton Railway Station along existing poles to the junction of the Broadmount Extension, near Nankin Creek, a distance of 10 miles 30 chains more or less, repairing the existing line where necessary between North Rockhampton Railway Station and the Junction of the Broadmount Extension, and the construction of a new telegraph line, from the Junction, near Nankin Creek, to Broadmount, a distance of 15 miles 25 chains more or less.

The Government reserve the right to deviate from either road or railway if any such deviation should be found advisable; the work on any such deviation to be paid for at schedule rates.

General Conditions.

1. The words "Inspecting Officer" throughout these conditions and specification shall mean any officer appointed by the Postmaster-General to supervise the work.

2. The word "Contractor" throughout these conditions and specification shall mean all and any of the partners of a firm, or any single individual.

3. The wire, insulators, insulator pins or spindles, brackets, screws, galvanised iron roofs, roof nails, lightning conductors, staples for lightning conductors, and bolts for struts will be supplied by the Government and delivered to the contractor in Brisbane. Any surplus material after the completion of the contract must be delivered by the contractor, free of charge, at Rockhampton Telegraph Office.

4. The whole of the works included in this contract must be completed and handed over to the Government within two (2) months of the notification of the acceptance of the Tender; and should the completion of the works be delayed beyond that date, the contractor shall forfeit and pay to the Government, as and for liquidated and ascertained damages, the sum of five pounds sterling for every week or part of a week that shall elapse after such date until their completion, and the amount of such damages may be deducted by the Government from any money payable to the contractor under this contract.

5. Payment will be made monthly to the extent of seventy-five (75) per cent. on the value of the work reported to have been completed by the officer appointed to inspect the same; but, notwithstanding such report and payment on account, the Under Secretary and Superintendent of Telegraphs, or other officer appointed by him in that behalf, shall have full power at any time afterwards, before final payment shall be made, of rejecting and condemning any of the work or materials in respect of which such report and payments may have been made. Certificates must be produced from the Chairman of the Divisional Boards through whose Divisions the line passes or has been taken, and from property owners if through or near the boundaries of private lands, that no claims are made by them under Clause 7, before final payment will be made. The total balance will be paid when the entire contract shall have been completed and all claims settled to the satisfaction of the Government.

6. The Government reserves to itself the right to make use of the line for the transmission of messages prior to final completion. Such use of the line not to prejudice in any way the power to subsequently reject or condemn any portion of the work or materials.

7. The contractor may avail himself of the facilities afforded by "The Post and Telegraph Act, 1891," for obtaining materials, on signing a bond indemnifying the Government against any claims for compensation arising from the action of the contractor: Provided always that it shall be lawful for the Under Secretary and Superintendent of Telegraphs, from moneys due to the contractor, if not otherwise settled, to satisfy any such claim he may see fit.

8. No action or suit shall be brought or maintained by the contractor or the Under Secretary and Superintendent of Telegraphs against the other of them to recover any money for or in respect of or arising out of this contract, or any breach thereof by the contractor or the Under Secretary and Superintendent of Telegraphs, or for or in respect of any other matter or thing arising out of this contract, unless and until the contractor or the Under Secretary and Superintendent of Telegraphs has obtained a certificate of the inspecting officer for the amount sued for, and then only for the amount so certified.

9. The contractor will have to provide, at his own cost, all labour, plant, tools, material (other than that mentioned in Clause 3 of these conditions), or whatever else may be required for the due performance of this contract.

10. The contractor will be responsible for all claims for compensation for damage to fences or other property caused by the erection of the line, also for damage so caused to roads or the railway works; and if such claims are not defrayed, the Under Secretary and Superintendent of Telegraphs is authorised to pay the same from any moneys due to the contractor.

11. Should the contractor fail to proceed in the execution of, or to complete, the work in the manner and at the rate of progress required by the Postmaster-General, it shall be lawful for the Postmaster-General, by a notice in writing delivered to the contractor or his representative, or by a notice in the *Queensland Government Gazette*, to terminate the contract, as far as relates to the work remaining to be done, and to enforce the penalties for the non-fulfilment of the contract; and all sums of money which may be due to the contractor, together with all plant, materials, and implements in his possession on the ground, and all sums of money, whether named in the bond to be entered into by the contractor and his sureties, or otherwise, as penalties for the non-fulfilment of the contract, shall be forfeited to the Government, and the amount shall be considered as ascertained damages for breach of contract.

12. A deposit of a sum equal to ten (10) per cent. of the total tender cost of the whole work must accompany each Tender (without which Tenders will be informal), also a memorandum signed by the party tendering, and two responsible persons as sureties, agreeing to be answerable for the due performance of the contract within the time stipulated, in the event of the Tender being accepted, and undertaking in that event that they will severally execute and deliver at the Office of the Under Secretary and Superintendent of Telegraphs, in Brisbane, within ten (10) days from the date of the notification of the acceptance of the Tender, a bond to Her Majesty in a sum equal to twenty (20) per cent. on the amount of the Tender.

13. All workmen and employees engaged upon the works by the contractor shall be paid their full wages in lawful money, at least once in every month.

14. Such payments shall be made in some building or place convenient to the site of the works, but in no case shall such payments be made at any public-house or other place where liquors or refreshments are sold.

15. The contractor shall not sell or dispose of, or be in any way interested in the sale or disposal of, alcoholic liquors or other articles of consumption, to the workmen or employees engaged upon the works.

16. If the contractor sublets any portion of the works, all workmen and employees engaged thereon shall be paid by the sub-contractor at the times and under the conditions herein specified, but in the event of the sub-contractor failing to make any such payments then the contractor shall be liable to make the same.

17. Before the payment of any money to the contractor, the Postmaster-General may require from him satisfactory evidence that all the workmen and employees then and theretofore engaged upon the works have been paid their wages and other lawful claims of every kind in full, in lawful money, and to the latest date at which such wages and claims are due; and the Postmaster-General may withhold the payment of all moneys due or that may become due to the contractor, until he is satisfied that such wages and claims have been paid.

18. If the contractor fails or omits to pay to any workmen or employees engaged upon the works their full wages in cash once at least in every month, the Postmaster-General may, as often as the same shall happen, upon complaint of such failure or omission made, and upon evidence satisfactory to him of an order or judgment of a Court of Petty Sessions, or of any other court of competent jurisdiction, pay the amount mentioned in such order to such workmen or employees, and deduct the amounts so paid from any sum or sums which may be due or become due to the contractor.

19. Although the Under Secretary and Superintendent of Telegraphs or his officers may furnish any information in connection with this contract, any such information shall not relieve the contractor from any risk or from the fulfilment of his contract, nor will the fact of any such information being given entitle the contractor to make any claim for compensation.

20. The inspecting officer shall have the power to order the dismissal or removal of any foreman or workman employed

by the contractor upon giving written notice to the contractor of his intention to do so; and if such foreman or workman is retained by the contractor after such notice has been given, then the inspecting officer shall have the power to delay the signing of any voucher or certificate for payment for any work done until such order has been obeyed.

21. The Government reserve the right to alter the Specification in any matters of detail if any such alterations should be found necessary; the prices to be paid for any such alterations to be mutually agreed upon by the Government and the contractor before the alterations are adopted. No extras will be allowed unless the prices have been arranged previous to the work being carried out.

22. The decision of the Government Electrical Engineer will be final in all matters of dispute between the contractors and the Government in regard to this contract.

23. The contractor must shift camp for the inspecting officer as required.

24. The Government does not bind itself to accept the lowest or any Tender.

Specification.

1. The course of the line to be marked out by the contractor, under the direction of the inspecting officer.

2. The clearing, where necessary, to be carried out in accordance with and in the manner specified in Clauses 3, 4, 5, and 6. Clearing is only to be done in such places as the inspecting officer may direct.

3. All trees, dead timber, and underwood standing within forty (40) feet on one side of the line to be felled; and all fallen timber, whether felled by the contractor or otherwise, within a radius of twenty (20) feet from each pole or strut, also for six (6) feet outside the railway fence or course of same, to be cleared away. Where the line is not within the railway fences, all trees, dead timber, and underwood standing within forty (40) feet of each side of the line to be felled, and all fallen timber, whether felled by the contractor or otherwise, within a radius of twenty (20) feet from each pole or strut, to be cleared away. Where the line is not within the railway fences a bridle track of not less than eight (8) feet in width shall be left in the centre of the clearing. Such track shall be cleared of all fallen timber whether felled by the contractor or otherwise.

4. Any branches overhanging from trees beyond the distance mentioned, which, in the judgment of the inspecting officer, might endanger the line, to be removed. Every care must be taken not to damage fencing or any other property of any kind or the railway works.

5. Trees outside the distance mentioned, which, in the judgment of the inspecting officer, might endanger the line, are to be felled.

6. All existing cleared roads which may become blocked by fallen timber must be cleared by the removal of the timber to the original width of such roadway. In cases where tracks may become blocked, all fallen timber must be removed, leaving a clear space of not less than twenty (20) feet in width, following the course of such track.

7. Poles to be straight saplings of the best description of narrow-leaved ironbark or other approved timber (the approval of any timber will rest with the Government), with the bark removed, not less than six (6) inches in the least diameter, clear of sapwood, at the small end, and not less than thirty-two (32) inches in circumference at five (5) feet from the butt, and not less than twenty-seven (27) feet in length; to be carefully and thoroughly charred from the butt upwards to one (1) foot above the ground, the charred portion to be well coated with hot coal tar. Extra-length poles to be three (3) inches greater in circumference at five (5) feet from the butt for each additional five (5) feet or fraction of five (5) feet in length and to be charred from the butt upwards to one (1) foot above the ground irrespective of the depth in the ground, the charred portion to be well coated with hot coal tar.

8. The top of each pole to be sawn off with a bevel of one (1) in one (1) on each side, so as to leave an equal slope on each side of the pole. Over the top thus formed a galvanised iron roof is to be neatly nailed to the pole with four (4) two (2) inch clout nails, two nails on each side. The iron roof thus formed must project beyond the poles on all sides about two (2) inches.

9. Brackets to be fastened to the poles with three (3) inch coach screws. The sapwood must always be cut away to allow the base of the bracket to fit on hard, sound timber.

The top bracket must be fixed nine (9) inches from the top of the pole, and on the right-hand side looking to the "Up" station (Brisbane side); if any further brackets are required they are to be placed alternately on opposite sides of the poles, and spaced seven (7) inches apart. They must not be fixed opposite to each other (in the same horizontal plane), but carefully spaced as instructed above. At every angle where, in the event of a wire leaving an insulator, there is the possibility of an accident, however slight, an iron insulator pin must be used, and the wire fastened on the inside of the insulator. Brackets must always be at right angles to the line of wires, except at angles, in which case the angle must be equally divided.

10. Lightning conductors to be of No. 8 gauge galvanised iron wire, to be stretched straight from the top to the butt of each pole, and to be secured thereto with fourteen (14) staples of galvanised iron wire one and a-half ($1\frac{1}{2}$) inches in length. Staples bent in driving must be drawn and replaced by straight ones. The top of the conductor to be twisted once round a three (3) inch coach screw driven four (4) inches below the top of the pole, and then bent so that it will project not less than six (6) inches above the iron roof on the top of the pole, but without touching the roof; the other end of the conductor to be bent under the butt of the pole. If the poles exceed the specified length, the lightning conductors shall be proportionately longer, and an additional staple shall be driven for every two (2) feet additional length. Where poles are alongside roads, the staples to be driven at every foot from the ground to a height of eight (8) feet. Lightning conductors to be affixed to the poles midway between the brackets, and always on the "Down" side of the pole.

11. The poles to be not more than eighty-eight (88) yards apart, unless specially directed; to be sunk five (5) feet in the ground, placed in a perpendicular position, and well rammed with rubble and earth. Extra-length poles to be sunk any extra depth in ground that the inspecting officer may direct.

12. At angles and other places where required, struts are to be supplied and fitted. Struts are to be of approved timber (approval rests with the Government); to be about twenty-one (21) feet three (3) inches in length, sawn off square at the butt; to be not less than six (6) inches, clear of sapwood, in the least diameter at the small end, and not less than twenty-four (24) inches in circumference at the butt. Struts should not weaken the pole; therefore as little as possible of the timber of the pole inside the sapwood should be cut away at the joint. The small end of the strut is to be carefully and neatly scarfed to fit the pole at seventeen (17) feet from the ground level for a twenty-seven (27) foot pole. The joint must be neat and well fitting. A one-half ($\frac{1}{2}$) inch bolt is to be used to fasten the head of the strut to the pole. The inspecting officer will give instructions as to the angle at which the strut is to be placed against the pole. Struts are to be charred on the butt and from thence upwards to one (1) foot above ground, the charred portion to be well coated with hot coal tar.

13. At such angles as the Inspecting Officer directs, instead of a strut, a block of timber shall be firmly wedged against the pole in such a way that it will bear against the strain. The earth is to be excavated to form a trench in which the stay-block will be buried. Such trench must be of sufficient depth to allow the stay-block to lie not less than four (4) inches below the natural surface of the ground. The trench shall be of such dimensions that the stay-block will fit into it tightly; it must be sunk in a direction transverse to the strain on the angle pole, and the log must be driven tight against the pole with timber wedges at each end. The dimensions of such stay-blocks shall be six (6) feet in length, twelve (12) inches in diameter, clear of sapwood at the smallest end and of timber approved by the Inspecting Officer. The sapwood must be removed from both pole and block where they come in contact, and both must be carefully charred and well coated with hot coal tar. All loose charcoal must be scraped off both pole and stay-block where they are in contact.

14. Where the inspecting officer so directs, a block is to be securely fitted to the foot of the strut. The ground must be undercut to take the strut block, so that any pull may be against unmade ground. In the event of the inspecting officer so directing, a base block must also be fitted to such poles. Base-blocks to be fitted transversely to either pole or strut and at a distance of 12 inches from the butt.

15. Dimensions of base blocks for these purposes to be three (3) feet in length by eight (8) inches in diameter, clear of sapwood. The block must be thoroughly charred and coated with hot coal tar before it is bolted to the pole. Any loose charcoal must be scraped off both strut, pole, and block before being bolted together. Blocks to be bolted to either struts or poles with half ($\frac{1}{2}$) inch bolts. Struts must be not less than three (3) feet in the ground.

16. All bolts used on any portion of this work must be provided with washers under the nuts $\frac{1}{2}$ -inch thick, and of a diameter equal to the largest diameter of the nut.

17. Angle poles must have a slight batter or rake from the vertical at the top to allow for settling. This batter must on no account exceed twelve (12) inches. Care must be taken that the batter or rake is against the strain.

18. The insulator pins are to be fitted in the brackets.

19. The wire is to be stretched in accordance with instructions to be given by the inspecting officer.

20. All insulators must be perfectly clean when placed upon the insulator pins; and if the inspecting officer considers that the insulators require washing, the contractor must wash them before they are placed on the poles. Clean fresh water must always be used when washing is required.

21. All joints are to be of the pattern known as the "Britannia" joint. The ends of the line wire where joined are to be thoroughly cleaned with a file or emery cloth; the ends

are then to be laid together and whipped round for two and a-half ($2\frac{1}{2}$) inches with No. 16 binding wire, which must also be thoroughly cleaned. The whole joint is then to be carefully soldered. Baker's soldering fluid, only, to be used as a flux. A supply will be provided by the Government.

22. The line wire is to be tied to the insulators with the binding wire supplied for that purpose and in the manner prescribed.

23. All material used in the construction of this work, or any part of it, must be of the best quality, and, together with the workmanship, is to be subject to the final approval or rejection of the Electrical Engineer, or any officer appointed by him to inspect the same.

Specifications, with Tender Forms attached, and all other information may be obtained on application at the Office of the Under Secretary and Superintendent of Telegraphs, Brisbane, and at the Telegraph Office, Rockhampton.

- "Road or Reserve"—A public road or reserve, as the case may be, under the control of the Board.

MEETINGS AND PROCEEDINGS.

Meetings.

2. Meetings of the Board are of two kinds—ordinary and special. Ordinary meetings are held at the office of the Board every eight weeks, on a Monday. A special meeting may be called on the requisition of two members at any time in the manner prescribed by the 130th section of the Act.

Minutes of proceedings—rough entries.

3. (a) In addition to the minute-book prescribed to be kept by the 133rd section of the Act, a rough minute shall be kept in which every item of business transacted by the Board at a meeting shall be then and there entered by the clerk, and subsequently re-entered by him in the manner prescribed by the Act.

Records to be verified.

(b) Before reading the minutes at a meeting the clerk shall hand the rough minute-book to the chairman, in order that while the minutes are being read he may verify the record before signing the same on confirmation by the Board.

Committee records.

(c) Resolutions of committees of the whole shall be transcribed into the minute-book of the Board, but the full text of reports from all other committees shall, when adopted by the Board, be entered in a committee minute-book.

Minutes of special meetings.

(d) The minutes of a special meeting must be confirmed at the next subsequent ordinary meeting.

Order of business.

4. The order of business at all ordinary meetings of the Board shall be as follows, that is to say:—

- (a) Reading and confirmation of minutes of last meeting;
- (b) Reading of correspondence (outward and inward) and taking such action (not inconsistent with these By-laws) as may be deemed expedient with respect thereto, and consideration of business arising from minutes of previous meeting;
- (c) Presentation of petitions or memorials and committee reports;
- (d) Consideration of tenders and ratification of contracts;
- (e) Consideration of business arising out of minutes;
- (f) Consideration of notices of motion;
- (g) Reception of notices of motion for next meeting.

No discussion upon minutes.

5. No discussion shall take place upon the minutes of proceedings, except as to their accuracy or for the rectification of a clerical error.

Petitions.

6. A petition shall only be presented by a member who makes himself responsible for the respectful nature of its language, and, so far as possible, acquaints himself before presentation with the subject to which it refers.

Business-paper.

7. The clerk shall provide every member with a paper, on which the business to be transacted at the meeting will be fairly set forth, including a list of all motions of which previous notice has been given.

Notice of motion.

8. A notice of motion must be in writing, signed by the member presenting it, and delivered to the chairman or clerk at least seven days before the day named for its consideration. Notices of motion must be placed on the orders of the day in succession, according to priority of reception.

No business without notice.

9. No business not entered in the business-paper for the day can be discussed or transacted, unless after suspension of the general rules in the manner provided by clause 46 of these By-laws.

When member giving notice is absent.

10. In the absence of a member who has given notice of a motion, any other member present may move or postpone the same. Otherwise the motion shall lapse.

Attendance-book.

11. Before the twentieth day of January in each year a list shall be prepared and published by the clerk showing the number of meetings held during the preceding year and the number of times that each member has attended; and for this purpose an attendance-book shall be kept, in which each member present at every meeting shall sign his name before the orders of the day are entered upon.

Call of the Board.

12. A member may, at an ordinary meeting of the Board, move for a call of the Board to consider any subject within the jurisdiction of the Board at the next or any subsequent meeting specified in the motion, and on such motion being passed, due notice must be given in the notice-paper of the day for which the call is made.

Penalty for non-attendance.

13. Any member not in attendance at the meeting for which a call has been made, or at any adjournment thereof, shall be liable to a penalty not exceeding twenty shillings. Provided that for reasonable cause the absence of such member may be excused by the chairman on motion passed by the Board.

ORDER OF DEBATE.

Chairman's decision to be final.

14. The chairman shall preserve order at all meetings, and his decisions, subject to the provisions of the next following clause of these By-laws, shall be final and binding upon every member.

Call to order.

15. (a) It is competent for any member to rise to order, on which the member speaking must at once resume his seat and remain silent until the point of order has been succinctly but briefly stated by the member who has risen.

(b) The chairman must thereupon decide the point of order or practice, and, if required, cite the rule applicable to the case without argument or comment.

(c) It is then competent for any member, not being the member who rose to order, to demand that the sense of the Board be taken on the point, when the decision of the majority shall prevail and be final and binding on every member.

Motion may be read during discussion.

16. At any time during a debate, but not so as to interrupt a speaker, a member may require the motion or question under discussion to be read for his information.

Speaker must rise and address chairman.

17. A member desiring to speak must rise and address the chairman, who shall at once call a speaker to order who addresses a member except through the chairman.

Claim to pre-audience.

18. When two or more members rise to speak simultaneously, the chairman shall forthwith decide which member is entitled to pre-audience, and any member who persists in standing or speaking in defiance of the chairman's decision shall be deemed to be disorderly.

Speaker must not digress.

19. A member having audience must not digress from the subject of debate.

A member may only speak once.

20. No member may speak more than once on any matter under discussion, unless as the mover of a motion in reply, or with the permission of the Board in explanation as a personal privilege. But this rule does not apply to meetings in committee.

Reply.

21. The mover of a motion on notice is entitled to a reply before the close of the discussion.

Formal questions.

22. A question may be put to the chairman by a member (but not so as to interrupt a speaker), or by one member to another through the chairman, but the chairman or a member is not bound to answer a frivolous, untimely, or offensively personal question, or a question of which notice has not been given, or which is asked at a meeting after the orders of the day have been entered upon.

Informal debates.

23. After disposal of the correspondence and before the orders of the day are entered upon, but at no other time, a member may move the adjournment of the Board for the purpose of calling attention to a matter of public interest, when debate may ensue, but an amendment cannot be submitted. Such motion need not be seconded.

Orders of the day defined.

24. For the purposes of these rules, the orders of the day shall be deemed to comprise business arising out of proceedings of the last previous meeting and motions of which due notice has been given on the business-paper.

Member may protest.

25. A member must not speak disrespectfully of any proceeding or decision of the Board, but he is entitled immediately after the adoption of a resolution, and before other business has intervened, to enter his protest against the decision, which protest must be recorded in the minute-book of the Board.

Respect for the chair.

26. Every member who takes his seat at the Board is assumed to recognise that it is his duty to show respect for the chair, and at all times to loyally assist the occupant thereof in maintaining order at the meeting.

Penalty for disorderly conduct.

27. A member who refuses to submit to the ruling of the chairman, or to the decision of the Board, at any meeting, or who interrupts the proceedings after being called to order, shall be liable to the penalty prescribed for a breach of these By-laws.

Rescission of motions.

28. No motion, the effect of which would be to rescind a resolution passed by the Board during the same divisional year, shall be received or passed unless a call of the Board has been made specially for that purpose; and no resolution so rescinded, or similar motion, shall during the same divisional year be again entertained by the Board.

Motions and amendments—withdrawn only by consent.

29. (a) A motion once placed on the business-paper, or moved at a meeting, cannot be withdrawn unless by consent of the Board.

How amendments are put.

(b) One or more amendments may be proposed on a motion before the Board. When more than one amendment is moved, the question shall be first put on the last amendment, then on the next in succession, and then on the original motion in the inverse order in which they were moved. Provided that when a motion or amendment relates to the fixing of salaries, rates, or other matters of finance, the lowest sum shall be put first, then the next lowest, and so on to the highest.

Must be seconded.

(c) A motion or amendment not seconded cannot be discussed by any member except the mover, nor be put by the chairman.

Affirmative and negative.

(d) In submitting a motion or amendment, the chairman must put the question first in the affirmative and then in the negative.

Amendment becomes substantive motion.

(e) When an amendment is carried, the motion as amended thereby becomes the substantive motion, upon which a further amendment may be moved before it is finally dealt with.
